Luckily David Pogue is back to help you make sense of it with humor, authority and 500 illustrations. The important stuff you need to know. What's new in 8.1. The update to 8.1 offers new apps, a universal Search, the return of the Start menu and several zillion other nips and tucks. New features: Storage Spaces, Windows To Go, File Histories. If Microsoft wrote it, this book covers it. Security: Protect your PC from viruses, spyware, spam, sick hard drives and out of control kids. The network: HomeGroups connecting from the road, mail, Web, music streaming among PCs, this book has your network covered. The software: Media Center, Photo Gallery, Internet Explorer, speech recognition, this one authoritative, witty guide makes it all crystal clear. Abstracts, 1981 **The Humanities Computing Yearbook 1989-1990** Ian Lancashire, 1991 This is the second in a series of comprehensive annual reference guides to the use of computers in all the disciplines of the humanities. Like its predecessor, this volume provides a taxonomy of the field and an annotated survey of publications, research centers, text archives and termbanks, electronic communications software and hardware relevant to the humanities. It also includes special larger entries for important software that offer up to date information and practical help in applying that information to research projects and instruction in colleges and universities. For the 1989-1990 edition, Lancashire has for the first time appointed an international advisory board of specialists to assist in discovering, assembling and evaluating materials for inclusion and to keep up with the rapidly developing nature of the field and its international constituency. Lancashire has included many completely new or revised sections, including a major new chapter on computing in Law. A monumental work of current and enduring value. The Humanities Computing Yearbook will prove invaluable to a wide range of students, teachers and researchers in humanities and social sciences, computational linguistics and related fields in computer science.
