Amateur Radio Pedestrian Mobile Handbook: Second Edition Edward Breneiser, 2014-03-05. If you plan to operate a ham radio pedestrian mobile station, this is the book for you. This handbook will guide you through all phases of designing, building, and operating your PM station. This is the second edition of my handbook. You will notice some changes from the first edition. The first change is in the battery chapter as most of the charging information has been deleted from that chapter. The chapter on Military Radios has also been deleted from the text. There are numerous books on this subject. I have also added a chapter on tuning your PM station and another chapter on weather and the environment. I have also included a new chapter on what most people call Apps. With the explosion of mobile devices in society, hams now also use their smart devices at home and most other places they visit. I've added some cool apps for use out in the great outdoors. Also look at the new chapter I added on stretching.

Signal Processing and Networking for Big Data Applications Zhu Han, Mingyi Hong, Dan Wang, 2017-04-27. This unique text helps make sense of big data in engineering applications using tools and techniques from signal processing. It presents fundamental signal processing theories and software implementations, reviews current research trends and challenges, and describes the techniques used for analysis, design, and optimization. Readers will learn about key theoretical issues such as data modelling and representation, scalable and low complexity information processing and optimization, tensor and sublinear algorithms, and deep learning and software

architecture and their application to a wide range of engineering scenarios Applications discussed in detail include wireless networking smart grid systems and sensor networks and cloud computing This is the ideal text for researchers and practising engineers wanting to solve practical problems involving large amounts of data and for students looking to grasp the fundamentals of big data analytics
