Htc Viva Manual:

Virtual Reality in Manual Order Picking Jan-Karl Knigge, 2021-08-30 The introduction of consumer level head mounted devices HMDs has led to a major drop in the application costs of virtual reality VR making the technology available for a wide range of users To understand if VR HMDs can be used for planning and training in the context of manual order picking this thesis provides the results of a large scale randomized controlled study in which order picking has been compared between a virtual and a real environment The results imply that VR HMDs can indeed be used by manufacturers and warehouse operators in a rack planning process if the reduction of searching times or the perceived workload is in focus Additionally the findings enable the use of VR HMDs for scientific research on human centred rack design Finally the thesis highlights the usability of VR HMDs for training manual order picking activities Virtual, Augmented and Mixed Reality: Interaction, Navigation, Visualization, Embodiment, and Simulation Jessie Y.C. Everyday Virtual and Augmented Reality Adalberto Simeone, Benjamin Weyers, Svetlana Bialkova, Robert W. Lindeman, 2023-02-18 This edited book introduces readers to the area of Everyday Virtual and Augmented Reality With Virtual and Augmented Reality technologies becoming more pervasive in our homes and workplaces new use cases and scenarios emerge together with new challenges that need to be addressed These challenges encompass the design and implementation of appropriate VR AR applications for ordinary environments that were not built with the explicit intention of supporting VR systems The everyday domestic environments present a range of issues that are usually not present in the physical locations purposed for VR and AR use in academic or professional environments such as constrained spaces presence of obstacles absence of instrumentation social and organizational restrictions etc To address the above challenges we collect the latest work from the Virtual Reality and Augmented Reality research community by combining the presentation of general definitions and characterization of the field of interaction concepts and techniques of a variety of use cases and areas The constellation of different environment examples from education sport to consumer and marketing from across the globe and platforms provide a comprehensive discussion on scientific and engineering methods which enable the development of VR AR systems in everyday context
