applications available in today's modern web such as Google Maps and Flickr desktop applications than the old style web sites you are used to. You've probably also wished that you could create such things and then thought, "nahhh I'd need to know a lot of complicated code to be able to even start creating sites like these." Well, think again. There is a lot of complicated code involved in cutting edge Ajax style web applications but a lot of the hard work is already done for you and available on the Web. JavaScript libraries exist to provide most of that Ajax DOM Scripting functionality out of the box. Application programming interfaces (APIs) exist to allow you to transplant complicated applications such as Google Maps and Flickr right into your own web sites. And hosting services such as Flickr and YouTube provide all you need to store and retrieve your media, be it images, video, or whatever, at your leisure without having to worry about bandwidth issues and file naming nightmares. All you need to know is enough to successfully wire together all this functionality successfully and responsibly, and this book shows you how. It starts from the very beginning of your journey, showing you what's available, what you need, and how to set up an effective development environment. After a solid base has been built, it shows you how to build up each aspect of your site, including storing, retrieving, and displaying content, adding images and video to your site, building effective site navigation, and laying it all out beautifully using CSS, promoting your content so you will attract visitors to your site, and adding special effects to enhance usability and design aesthetics, all with ready-made functionality available on the Web. Life as a web developer has never been easier.

### **Rhetoric and the Digital Humanities** Jim Ridolfo, William

Hart-Davidson, 2015-01-19. The digital humanities is a rapidly growing field that is transforming humanities research through digital tools and resources. Researchers can now quickly trace every one of Issac Newton's annotations, use social media to engage academic and public audiences in the interpretation of cultural texts, and visualize travel via ox cart in third century Rome or camel caravan in ancient Egypt. Rhetorical scholars are leading the revolution by fully utilizing the digital toolbox, finding themselves at the nexus of digital innovation. *Rhetoric and the Digital Humanities* is a timely multidisciplinary collection that is the first to bridge scholarship in rhetorical studies and the digital humanities. It offers much needed guidance on how the theories and methodologies of rhetorical studies can enhance all work in digital humanities and vice versa. Twenty-three essays, over three sections, delve into connections, research methodology, and future directions in this field. Jim Ridolfo and William Hart-Davidson have assembled a broad group of more than thirty accomplished scholars. Read together, these essays represent the cutting edge of research, offering guidance that will energize and inspire future collaborations.
