**Computer Vision - ACCV 2020** Hiroshi Ishikawa,Cheng-Lin Liu,Tomas Pajdla,Jianbo Shi,2021-02-26 The six volume set of LNCS 12622 12627 constitutes the proceedings of the 15th Asian Conference on Computer Vision ACCV 2020 held in Kyoto Japan in November December 2020

The total of 254 contributions was carefully reviewed and selected from 768 submissions during two rounds of reviewing and improvement. The papers focus on the following topics: Part I 3D computer vision segmentation and grouping; Part II low level vision image processing motion and tracking; Part III recognition and detection optimization statistical methods and learning; robot vision; Part IV deep learning for computer vision generative models for computer vision; Part V face pose action and gesture video analysis and event recognition; biomedical image analysis; Part VI applications of computer vision vision for X datasets and performance analysis. The conference was held virtually. **Congressional Record** United States.

Congress, 2017-11 AI, Machine Learning and Deep Learning Fei Hu, Xiali Hei, 2023-06-05 Today Artificial Intelligence AI and Machine Learning Deep Learning ML DL have become the hottest areas in information technology. In our society many intelligent devices rely on AI ML DL algorithms tools for smart operations. Although AI ML DL algorithms and tools have been used in many internet applications and electronic devices they are also vulnerable to various attacks and threats. AI parameters may be distorted by the internal attacker the DL input samples may be polluted by adversaries the ML model may be misled by changing the classification boundary among many other attacks and threats. Such attacks can make AI products dangerous to use. While this discussion focuses on security issues in AI ML DL based systems i.e. securing the intelligent systems themselves AI ML DL models and algorithms can actually also be used for cyber security i.e. the use of AI to achieve security. Since AI ML DL security is a newly emergent field many researchers and industry professionals cannot yet obtain a detailed comprehensive understanding of this area. This book aims to provide a complete picture of the challenges and solutions to related security issues in various applications. It explains how different attacks can occur in advanced AI tools and the challenges of overcoming those attacks. Then the book describes many sets of promising solutions to achieve AI security and privacy. The features of this book have seven aspects. This is the first book to explain various practical attacks and countermeasures to AI systems. Both quantitative math models and practical security implementations are provided. It covers both securing the AI system itself and using AI to achieve security. It covers all the advanced AI attacks and threats with detailed attack models. It provides multiple solution spaces to the security and privacy issues in AI tools. The differences among ML and DL security and privacy issues are explained. Many practical security applications are covered.

**From Blockchain to Web3 & Metaverse** Huawei Huang, Jiajing Wu, Zibin Zheng, 2023-09-06 The Metaverse seamlessly integrates the real world with the virtual world and allows avatars to engage in a broad range of activities including entertainment social networking and trading. In this book we dive into the Metaverse by discussing how blockchains connect various Metaverse components digital currencies and blockchain empowered applications in the virtual world. On the other hand Web3 has also attracted considerable attention due to its uniquely decentralized characteristics. The digital economy currently undergoing a rapid development is a critical driver to highly efficient societies. It is imperative that we investigate how to use Web3 technologies to address the critical concerns encountered during the development of the digital economy.

by fully exploring Web3 In this book we also share insights into the Web3 based ecosystem in the Metaverse topics of interest include decentralized finance digital assets the asset trading market etc Unlike most works on the subject this book mainly concentrates on insights and discussions regarding blockchain the Metaverse and Web3 In other words it focuses on using blockchain technologies to enable an ecosystem for both the Metaverse and Web3 Topics addressed include blockchain fundamentals smart contracts value circulation in the Metaverse the connection between the Metaverse and Web3 the establishment of the Metaverse on the basis of blockchain technologies decentralized autonomous organization decentralized storage digital economy Web3 based economic systems for the Metaverse etc This book will be a valuable resource for students researchers engineers and policymakers working in various areas related to blockchain the Metaverse and Web3 We hope that it will also inspire readers from academia and industry alike and ultimately help them create a truly open fair and rational ecosystem for the Metaverse and Web3 New Technologies Applied in Apple Production Yande Liu,Liling

Yang,Yinyan Shi,Guantian Wang,Dazhou Zhu,Zhao Zhang,2024-10-28 This book focuses on state of the art sensing and automation technologies for apple production which provides innovative knowledge on imaging processing AI algorithms sensing techniques non destructive detection and robotics It falls into the area of applied science more specifically engineering This book including a total of seven chapters provides undergraduates or graduate take away knowledge for autonomous apple production which include but not limited to apple harvest robotics autonomous pollination fruit quality detection and postharvest infield sorting A major innovative for this book is that it provides case studies for readers easy understanding The incentive behind this book is to provide readers the latest systematic comprehensive new technologies for apple production **Healthy Aging and the Community Environment** Chanam Lee,Xuemei Zhu,Anna Patricia Lane,Erja

Portegijs,2021-11-29 Women, Consumption and Paradox Timothy de Waal Malefyt,Maryann McCabe,2020-04-23 Women are the world s most powerful consumers yet they are largely marketed to erroneously through misconceptions and patriarchal views that distort the reality of women s lives bodies and work This book examines the contradictions and mismatches between women s everyday experiences and market representations It considers how women themselves exhibit paradoxical behaviour in both resisting and supporting conflicting messages The volume emphasizes paradox as a form of agency and negotiation through which women develop dialogical meanings The contributions highlight the ways in which women transform inconsistencies and contradictions in advertising and marketing global consumption practices and material consumption into positive practices for living The rich range of ethnographic accounts drawn from countries including the United States Brazil Mexico Denmark Japan and China provide readers with a valuable perspective on consumer behaviour

AI, Sensors and Robotics in Plant Phenotyping and Precision Agriculture, volume III Yongliang Qiao,João Valente,Yu Jiang,Zhao Zhang,Zhou Zhang,Daobilige Su,2025-08-19 Plant production needs to be improved in a sustainable manner to accommodate a rising global population and anticipated climate change Plant phenotyping plays an essential role in

optimizing the genetic potential plant breeding and resource deployment in plant production Recent and comprehensive plant phenotyping emerges from the dynamic and local interaction of phenotypes with the spatially and temporally dynamic environment above and below ground while assessing complex plant traits such as growth development tolerance resistance physiology ecology yield and basic quantitative parameters The integration of smart sensors big data artificial intelligence non invasive technologies and information technologies is pivotal in deriving accurate plant physiological parameters at high throughput for precision agriculture Notably the advancement of wearable plant sensors which are environmentally friendly for long term use marks a significant stride toward smart data driven agriculture This technology provides novel solutions to complex challenges in agricultural production and environmental monitoring Wirtschaftskriege Nils Ole
