Balanced Injector Orientation for Propellant Combustion Elmer Beck,2014-05-26 In the course of researching basic rocket fuel combustion technology a diagram was obtained from the internet with a related formula that did not equate with the diagram Therefore a new understanding for the above formula was thought to be required for equalizing the intended mix ratio r of the propellants with their injection angles and where they have an axial flow of a zero tan along the combustion chamber axis The work in this paper culminates in two restructured formulas utilizing a new factor called the Velocity Ratio V_r It was developed with basic geometry trigonometry and some algebraic experimentation that allowed the results of the new formulas to equate with and correspond with the concept detailed in the referenced diagram for bi propellant combustion in impingement injection fueling systems This Velocity Ratio V_r is the quotient of the oxidant velocity divided by the fuel velocity
