Contemporary Public Administration in New Zealand Rodney Scott, Peter

Hughes, 2025-03-27 This book provides an updated account of New Zealand public administration including insider stories of leading reform. Hailed for its distinctiveness and high performance, New Zealand's radical public service reforms of the 1980s were studied, praised, criticised, and emulated around the world. However, New Zealand has not stood still. The 80s model had tremendous strengths, reducing some problems but also creating new problems and exacerbating others. More recent reforms layered cultural and behavioural approaches on top of earlier changes. This book, co-authored by the head of the New Zealand public service, describes decades of change: what worked, what didn't, and what challenges remain.

Implementation

Science Per Nilsen, 2024-05-13 This core textbook introduces the key concepts, theories, models, and frameworks used in implementation science and supports readers applying them in research projects. The first part of the book focuses on the theory of implementation science, providing a discussion of its emergence from the evidence-based practice movement and its connections to related topics such as innovation research. It includes chapters looking at a wide range of theories, methods, and frameworks currently used in implementation science and a chapter focusing on suitable theories that could be imported from other fields. The first part also addresses strategies and outcomes of implementation and discusses how researchers can build causal pathways adapted to their study. The second part of the book focuses squarely on putting the theory of implementation science to work in practice, with chapters discussing research methods used in the field and how to select the most appropriate approach. This section also features several chapters presenting in-depth case studies of specific applications. This multidisciplinary text is an essential resource for graduate students from a range of healthcare backgrounds, taking courses on implementation science as well as researchers from medicine, nursing, public health, allied health, economics, political science, sociology, and engineering.
