Source-differencebetween.net

## Outpatient Coding

Outpatient coding refers to a patient treated but is not admitted to the hospital for an extended stay.

The outpatient prospective payment system (OPPS) is a prospective payment system that provides reimbursement for hospital outpatient services.

It uses CPT or HCPCS coding systems to report procedures.

The diagnoses are often not established at the time of the first visit.

Reimbursement is based on ambulatory payment classifications APCs.

## Inpatient Coding

Inpatient coding is when a patient is formally admitted to a hospital upon the physician's orders.

The inpatient prospective payment system (IPPS) is the reimbursement methodology for hospital inpatient services.

The ICD - 10- PCS is the inpatient procedural coding system.

The principal diagnosis is the key to determining the resources required by a patient.

Reimbursement is based upon diagnosis-related groups (DRGs).
