

SAMPLE 1 : INQUIRY ESSAY

Nuclear power is just one of many forms of alternative energy we are looking at today. In many ways it seems like a good answer; there has only been one nuclear emergency in the United States to date, nuclear power reactors produce no greenhouse gasses, and one fuel pellet (I'll explain these a little later) can generate the same amount of energy as 149 gallons of oil, or 1,780 lbs. of coal (Hansen). On the other hand, nuclear power does produce radiation and nuclear waste. Another huge threat of nuclear power is the possibility of a nuclear meltdown. So, how great are the dangers of nuclear energy, and how great are the benefits? What are the positive and negative effects of the further development of this technology?

Before I examined nuclear energy my views on nuclear energy were mostly positive. Firstly, global warming is a big threat; not just to Americans or humans, but to almost every living organism on the planet. It is our job to do whatever we can to stop the damage we are doing to our planet, and to begin to reverse it. Nuclear power is a good way to lessen our dependency on fossil fuels, and to lower our CO2 output. Secondly, countries like France and Belgium are proving that nuclear energy can work on a large scale; they already get more than 50% of their energy from nuclear power. Finally, although a nuclear meltdown is the terrifying crisis that can come from nuclear power, in the entire history of nuclear power there has only been one nuclear meltdown; the nuclear power plant in Chernobyl, Russia experienced a meltdown in 1986. No new nuclear power plants have been built in America since the meltdown, despite the fact that the technology in our plants has gotten safer and more efficient.

Three of my sources stood out as being the most informative, all three of them were from the *CQ Researcher*. "Energy and the Environment", by Mary H. Cooper gave a lot of specific information on how global warming has affected the nuclear power industry. "Nuclear Waste", by Brian Hansen looked into how the waste is being stored, the radiation created by this waste and how it affects us, and Yucca Mountain, the possible future sight of the federal nuclear waste reserve. "Nuclear Energy" by Jennifer Weeks was the best source, it gave information about the entire nuclear process, viewpoints from both sides of the issue, and it was the most recent report I found on the subject.
