producing and perpetuating sectoral class sub national and national identities which in turn in the peculiar South African setting are almost invariably analogous with the historical fault lines determined and dictated by language as a marker of ethnic and racial identity The chapters in the book grapple with the nuances related to these intersections in the understanding that higher education language policies overt and or covert largely structure institutional cultures or what has been described as curriculum in higher education institutions Together the chapters examine the roles played by higher education by language policies and by the intersections of these policies and ethnolinguistic identities in either constructing and perpetuating or deconstructing ethnolinguistic identities upon which the sector was founded The introductory chapter lays out the background to the entire book with an emphasis on the policy and practice perspectives on the intersections The middle chapters describe the so called White Universities Black Universities and Middle Man Minorities Universities The final chapter maps out future directions of the discourses on language and identity formation in South Africa s higher education **Knowledge Engineering and Knowledge Management** Eva Blomqvist,Paolo Ciancarini,Francesco Poggi,Fabio Vitali,2016-11-12 This book constitutes the refereed proceedings of the 20th InternationalConference on Knowledge Engineering and Knowledge Management EKAW 2016 held in Bologna Italy in November 2016 The 51 full papers presented were carefully reviewed and selected from 171 submissions The papers cover all aspects of eliciting acquiring modeling and managing knowledge the construction of knowledge intensive systems and services for the Semantic Web knowledge management e business natural language processing intelligent information integration personal digital assistance systems and a variety of other related topics A special focus was on evolving knowledge i e the impact of space and time on knowledge representation concerning all aspects of the management and acquisition of knowledge representation of evolving contextual and local models **Edinburgh Handbook of Evaluative Morphology** Nicola Grandi,2015-06-03 With examples drawn from over 200 world languages this ground breaking volume presents a state of the art overview of evaluative morphology *Sustainable Human Resource Management in Tourism* Tom Baum,Ann Ndiuini,2020-04-11 This book addresses the application of sustainable HRM principles within tourism in the specific context of Africa a neglected area of study It draws on diverse aspects of HRM from the micro individual through the meso level organisational to the macro level policy governmental It also reflects the diverse challenges facing a critical area within emerging African tourism that of its workforce The book is substantially research based and provides a state of the art picture of emergent studies in this area drawing on case examples from a wide range of African contexts As such it provides a comprehensive resource and starts discussion in an emergent research area **The Routledge Handbook of Pidgin and Creole Languages** Umberto Ansaldo,Miriam Meyerhoff,2020-11-29 The Routledge Handbook of Pidgin and Creole Languages offers a state of the art collection of original contributions in the area of Pidgin and Creole studies Providing unique and equal coverage of nearly all parts of the world where such languages are found as well as situating each area

Unstable Ground Rosalind C. Morris,2025-03-04 What has gold done to people What has it made them do The Witwatersrand in South Africa once home to the world s richest goldfields is today scattered with abandoned mines into which informal miners known as zama zamas venture in an illicit often deadly search for ore Based on field research conducted across more than twenty five years around these mines Unstable Ground reveals the worlds that gold made possible and gold s profound costs for those who have lived in its shadow and dreamt of its transformative power From the vantage point of the closure of South Africa s gold mines Rosalind C Morris reconsiders their histories beginning in the present and descending into the pasts that shaped them Anchored in evocative descriptions of mining in the ruins this book explores the social worlds built on gold and the lives that were remade and sometimes undone by the industry over a century and a half Viewing this industry from its margins against the backdrop of the cyanide revolution the gold standard s demise and recurrent sinkholes as well as the insurrectionary protests and violence that continue to this day it recasts the history of South Africa and the incomplete effort to overcome apartheid amid the transformations of the global economy In writing that is by turns immersive incisive and poetic Morris unearths a history that was born of imperial aspiration and that persists as a
