These authors also found that the use of a single, non-validated questionnaire to assess the prevalence of depression in the general population is not sufficient. They concluded that the use of a validated questionnaire, such as the Beck Depression Inventory (BDI), is necessary to accurately assess the prevalence of depression in the general population.

For 1998, the average number of hours worked per week by full-time employees in the United States was 41.9 hours. The standard deviation was 3.5 hours. Assume that the number of hours worked per week by full-time employees in the United States is normally distributed. Find the probability that a randomly selected full-time employee in the United States works between 38 and 46 hours per week. Round your answer to four decimal places.
