Interaction Between Compilers and Computer Architectures Gyungho Lee, Pen-Chung Yew, 2013-03-14 Effective compilers allow for a more efficient execution of application programs for a given computer architecture while well conceived architectural features can support more effective compiler optimization techniques A well thought out strategy of trade offs between compilers and computer architectures is the key to the successful designing of highly efficient and effective computer systems From embedded micro controllers to large scale multiprocessor systems it is important to understand the interaction between compilers and computer architectures The goal of the Annual Workshop on Interaction between Compilers and Computer Architectures INTERACT is to promote new ideas and to present recent developments in compiler techniques and computer architectures that enhance each other s capabilities and performance Interaction Between Compilers and Computer Architectures is an updated and revised volume consisting of seven papers originally presented at the Fifth Workshop on Interaction between Compilers and Computer Architectures INTERACT 5 which was held in conjunction with the IEEE HPCA 7 in Monterrey Mexico in 2001 This volume explores recent developments and ideas for better integration of the interaction between compilers and computer
