

PROJECT REPORT GUIDELINES

Following are the guidelines for the preparation of MCA. Final Semester Report to be submitted to the Suresh Gyan Vihar University for the award of the MCA degree.

General guideline:

1. Remember that your project/training/dissertation report should be an honest report of the work done by you, content rather than size is important.
2. Take care about physical layout, diagrams, charts, etc. They should be properly numbered and referred to.
3. A good work can be "killed" by a badly written report. Take extreme care about language grammar, spelling and style. You are accustomed to take care of computer language while implementing; your report deserves the same care for English.
4. It will be good idea to submit the draft copy of the project/training/dissertation report to your guide or any other teacher in the department for his comments. This should be done well in advance, so that the reviewer has sufficient time for going through it in detail.
5. Remember that you will not be able to "disown" the report, make it something you will be proud of.
6. Don't wait for an inspiration to start writing the report, be ready to revise it several times. About halfway through the project is good starting time for the writing report.

Riley,Marion J. Ball,Judith V. Douglas,2013-03-09 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons It does not attempt to compete with the primers already on the market Eminent international experts will edit author or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field Each book will be practical easy to use and well referenced Our aim is for the series to encompass all of the health professions by focusing on specific professions such as nursing in individual volumes

However integrated computing systems are only one tool for improving communication among members of the health care team. Therefore it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange. This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship. Our joint values put people first. If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients then our efforts will have succeeded.
