**Agencies Appropriations for 2011** United States. Congress. House. Committee on Appropriations. Subcommittee on Transportation, Housing and Urban Development, and Related Agencies, 2010 [Calibration of a Past Year Demand Model for Model Evaluation](#) David F. Pearson, Patricia L. Ellis, Stephen P. Farnsworth, 2002 The objective of this project was to perform an evaluation of the ability of the current modeling process in Texas to forecast travel behavior and patterns within the context of a controlled experimental design The project attempted to calibrate travel demand models using travel surveys conducted in the San Antonio Bexar County area in 1969 These models would then be applied to forecast travel behavior and

patterns for the years 1980 and 1990 with the results compared to observed conditions. Due to data limitations, researchers did not consider the model developed for 1970 acceptable in terms of meeting the calibration criteria that were established. This negated the application of the model to 1980 and 1990 since the results could not be interpreted with any confidence. A number of recommendations on the model information needs for retention in future model calibration validation efforts are made. The recommendations provide the basis for examining travel demand models within controlled conditions as a routine part of the modeling process.
