#### **Evolution: Natural and Artificial Selection**

#### Gizmo Warm-up

Dog breeds and other varieties of domesticated animals were developed through artificial selection. Dembski, 2006-11 Darwin's greatest accomplishment was to show how life might be explained as the result of natural selection But does Darwin's theory mean that life was unintended William A Dembski argues that it does not In this book Dembski extends his theory of intelligent design Building on his earlier work in The Design Inference Cambridge 1998 he defends that life must be the product of intelligent design Critics of Dembski s work have argued that evolutionary algorithms show that life can be explained apart from intelligence But by employing powerful recent results from the No Free Lunch Theory Dembski addresses and decisively refutes such claims As the leading proponent of intelligent design Dembski reveals a designer capable of originating the complexity and specificity found throughout the cosmos Scientists and theologians alike will find this book of interest as it brings the question of creation firmly into the realm of scientific debate
