Strangers in Their Own Land Arlie Russell Hochschild, 2016-09-06 In Strangers in Their Own Land the renowned sociologist Arlie Hochschild embarks on a thought provoking journey from her liberal

hometown of Berkeley California deep into Louisiana bayou country a stronghold of the conservative right As she gets to know people who strongly oppose many of the ideas she famously champions Hochschild nevertheless finds common ground and quickly warms to the people she meets among them a Tea Party activist whose town has been swallowed by a sinkhole caused by a drilling accident people whose concerns are actually ones that all Americans share the desire for community the embrace of family and hopes for their children Strangers in Their Own Land goes beyond the commonplace liberal idea that these are people who have been duped into voting against their own interests Instead Hochschild finds lives ripped apart by stagnant wages a loss of home an elusive American dream and political choices and views that make sense in the context of their lives Hochschild draws on her expert knowledge of the sociology of emotion to help us understand what it feels like to live in red America Along the way she finds answers to one of the crucial questions of contemporary American politics why do the people who would seem to benefit most from liberal government intervention abhor the very idea

The Meritocracy Trap Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also

knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people Cities and Sustainable Technology Transitions Marina van Geenhuizen,Adam Holbrook,Mozhdeh Taheri,2018-06-29 This enlightening book elucidates the leadership challenges of various cities in emerging transitions towards higher levels of sustainability It examines elements of three socio technical systems energy transport and healthcare while addressing technology invention commercialization mass production and adoption The book breaks new ground in the analysis of topical issues such as local cradle conditions incentive schemes niche development living labs impact bonds grass roots intermediation and adaptive policy making It offers a broad coverage of global systems of cities with a particular focus on Scandinavia Germany the Netherlands China Korea Japan the US and Canada **The Literary Gazette and Journal of the Belles Lettres, Arts, Sciences, &c**,1841 *Psychedelic Humanities* Erika Dyck,Tehseen Noorani,Nicolas Langlitz,Alex Dymock, Anne Katrin Schlag ,Oliver Davis,2024-06-19 Psychedelics are part of a resurgence of interest in consciousness studies especially as altered states of consciousness are being re examined in the context of psychedelic assisted therapies To date discussions about psychedelics in modern medicine have been dominated by studies in biomedicine However given that cultural factors play a significant role in the subjective effects of psychedelics psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences Socio-Economic Change and the Broad-Basing Process in India M. V. Nadkarni,2019-06-18 This book offers a new concept of inclusion of the marginalised in India the Broad basing Process The author examines how through this process increasing numbers of marginalised social groups can enter into the social political and economic mainstream and progressively derive the same advantages from society as the groups already part of it The book critically reviews how the broad basing process has worked in the past in India both before and after its independence It examines how social groups like Dalits OBCs Muslims women and the labour class have fared and how far economic development urbanisation infrastructure development and the digital revolution have helped the marginalised and promoted broad basing It also offers mechanisms to speed up broad basing in poorer economies A first of its kind this volume will be useful for scholars and researchers of political studies sociology exclusion studies political economy and also for general readers **Urban climate informatics** Ariane Middel,Benjamin Bechtel,Matthias
