Naval Doctrine Publication 4, 1995 Our nation's military power always has been a reflection of our ability to equip, train and support our forces. Each of these areas—equipment, training and support—is essential, a link in a chain. Inevitably, however, our newest, most capable weapon systems will deteriorate and even the best trained personnel will lose their

effectiveness quickly if denied proper support Providing such support requires a detailed smoothly functioning infrastructure and the experienced dedicated professionals to make it work NDP 4 Naval Logistics describes how we apply fundamental logistic principles functions and elements and how we use the resources of formal planning and logistic information support to attain the basic goal of operational force readiness Through the metaphor of a logistic pipeline it takes the reader from the manufacturer s shipping terminal to the end user At the same time it emphasizes that naval logistics means much more than material It is a complex weave of systems within systems which encompasses planning acquisition maintenance engineering support training transportation facilities operations and personnel support backing up naval forces day and night in peace and war
