The First 20 Hours Josh Kaufman,2014-05-27 What if it s possible to learn the basics of any new skill in 20 hours or less Research suggests it takes 10 000 hours to master a new skill and the earliest hours are always the most frustrating That s why it s so difficult to learn a new language play an instrument hit a golf ball or shoot great photos Josh Kaufman offers a better way His systematic approach to rapid skill acquisition shows you how to deconstruct complex skills maximize productive practice and remove common learning barriers By completing just 20 hours of focused deliberate practice you can pick up the basics in record time and have more fun along the way

Japan , Rational Machines and Artificial Intelligence Tshilidzi Marwala,2021-03-31 Intelligent machines are populating our social economic and political spaces These intelligent machines are powered by Artificial Intelligence technologies such as deep learning They are used in decision making One element of decision making is the issue of rationality Regulations such as the General Data Protection Regulation GDPR require that decisions that are made by these intelligent machines are explainable Rational Machines and Artificial Intelligence proposes that explainable decisions are good but the explanation must be rational to prevent these decisions from being challenged Noted author Tshilidzi Marwala studies the concept of machine rationality and compares this to the rationality bounds prescribed by Nobel Laureate Herbert Simon and rationality bounds derived from the work of Nobel Laureates Richard Thaler and Daniel Kahneman Rational Machines and Artificial Intelligence describes why machine rationality is flexibly bounded due to advances in technology This effectively means that optimally designed machines are more rational than human beings Readers will also learn whether machine rationality can be quantified and identify how this can be achieved Furthermore the author discusses whether machine rationality is subjective Finally the author examines whether a population of intelligent machines collectively make more rational decisions than individual machines Examples in biomedical engineering social sciences and the financial sectors are used to illustrate these concepts Provides an introduction to the key questions and challenges surrounding Rational Machines including When do we rely on decisions made by intelligent machines What do decisions made by intelligent machines mean Are these decisions rational or fair Can we quantify these decisions and Is rationality subjective Introduces for the first time the concept of rational opportunity costs and the concept of flexibly bounded rationality as a rationality of intelligent machines and the implications of these issues on the reliability of machine decisions Includes coverage of Rational Counterfactuals group versus individual rationality and rational markets Discusses the application of Moore s Law and advancements in Artificial Intelligence as well as developments in the area of

data acquisition and analysis technologies and how they affect the boundaries of intelligent machine rationality
