Christology in the Roman Near East Philip Michael Forness, 2018-10-25 Preaching formed one of the primary regular avenues of communication between ecclesiastical elites and a wide range of society. Clergy used homilies to spread knowledge of complex theological debates prevalent in late antique Christian discourse. Some sermons even offer glimpses into the locations in which communities gathered to hear orators preach. Although homilies survive in greater number than most other types of literature, most do not specify the setting of their initial delivery, dating, and authorship. *Preaching Christology in the Roman Near East* addresses how we can best contextualize sermons devoid of such information. The first chapter develops a methodology for approaching homilies that draws on a broader understanding of audience as both the physical audience and the readership of sermons. The remaining chapters offer a case study on the renowned Syriac preacher Jacob of Serugh c. 451-521, whose metrical homilies form one of the largest sermon collections in any language from late antiquity. His letters connect him to a previously little-known Christological debate over the language of the miracles and sufferings of Christ through his correspondence with a monastery, a Roman military officer, and a Christian community in South Arabia. He uses this language in homilies on the Council of Chalcedon, on Christian doctrine, and on biblical exegesis. An analysis of these sermons demonstrates that he communicated miaphysite Christology to both elite reading communities as well as ordinary audiences. Philip Michael Forness provides a new methodology for working with late antique sermons and discloses the range of society that received complex theological teachings through preaching.

Educating About Religious Diversity and Interfaith Engagement Kathleen M. Goodman, Mary Ellen Giess, Eboo Patel, 2023-07-03 This book arises out of a recognition that student affairs professionals have little preparation or guidance in dealing with matters of spirituality, religion, secularity, and interfaith work at a time of greater diversity in students' beliefs and from a broad recognition that there is a need to engage with this aspect of student life. For those who don't know how to begin and may be nervous about tackling a topic that has the potential to lead to heated disagreements, this book provides the resources and practical guidance to undertake this work. With the aim of providing student affairs practitioners and faculty with the tools they need to increase their comfort level and enable their ability to engage in discussions about belief both in and out of the classroom, the contributors provide foundational knowledge, concrete teaching ideas, sample activities, and case studies that can be used in a variety of settings. This book serves multiple audiences in student affairs by providing teaching ideas for practitioners who want to include a session or two about interfaith in their programs, as well as ideas for student affairs faculty who may be teaching one session on this topic or a whole course. The book is divided into four sections. The first offers context, provides the findings of research, and asks readers to reflect on the framework they use to embark on this work, whether a social justice framework that aims to highlight issues of power and privilege or an interfaith cooperation framework that aims to

create religious pluralism Part Two provides concrete ideas for creating courses activities events and programs focused on spirituality religion secularity and interfaith engagement as well as ideas for incorporating these topics into courses typically offered in student affairs preparation programs Part Three presents case studies to engage students practitioners and faculty in thinking about campus situations related to religious diversity Part Four provides some basic information about a variety of religions and worldviews held by college students

Something Old, Something New Wayne Glausser, 2018-03-01

Something Old Something New Contemporary Entanglements of Religion and Secularity offers a fresh perspective on debates surrounding religious and secular thinking In each chapter Wayne Glausser focuses on a topic of contemporary relevance in which something old the sacrament of extreme unction Greek rhetorical tropes scholastic theology entangles with something new psilocybin therapy for the dying the New Atheism cognitive science Glausser uses the term entanglement to describe his distinctive approach to the relationship between religion and secularity The concept of entanglement refers to a contentious but oddly intimate relationship in which secular ideas compete with corresponding religious convictions but neither side wins by displacing the other As traditional religious knowledge and values come into conflict with their secular counterparts the old ideas undergo stress and adaptation but the influence works in both directions Whether they do so consciously or unconsciously entangled secularists engage with and sometimes borrow from older paradigms they believe they have surpassed *Something Old Something New* takes an unusual approach to this popular debate and offers a new perspective in the conversation between believers and secularists This is a book that theists atheists agnostics and everyone still searching for the right label will find respectful but provocative
