Installation Notices

Caution

(Failure to observe the following items may cause serious consequences or damage to the objects)

- Dealers must explain in details the operations to their customers according to this manual.
- Wireless remote controller and parts are packed in the packing box supplied with the indoor unit.
- Before installing, check if the power supply and circuitry are normal and make sure the voltage is within $\pm 10\%$ of the voltage rating.
- The distance of  in the installation diagram is to ensure space for the air conditioner's performance. For convenience of service and maintenance in the future, install the air conditioner in the place with sufficient space in the vicinity.
- Care should be taken in cutting, extension and bending of the refrigerant piping and not to break the pipes. As this air conditioner uses new recyclable refrigerant, "R410A" be sure to follow three principles - keeping the refrigeration system dry, clean, and air tight, when installing the refrigerant piping.

Warning

(Failure to observe the following items may cause injury or death)

- Installation of air conditioner and electrical wiring must be handled by authorized installer only. do not attempt to handle them by yourselves (Handling charges are additional.)
- Before installing, read the installation instructions thoroughly and correctly.
- Use only those specified accessories when installing. otherwise, it may cause the unit body to fall, water leakage, current leakage and fire, etc.
- When discharging, refrigerant is required during installation, be sure to use an air vent and air breather, as refrigerant will produce toxic gas once it mixes with hot air.
- When performing wiring work, be sure to follow the electrical codes and installation instructions, and also be sure to use the power loops exclusively for the air conditioner.
- When installing or moving the units, the refrigeration system (piping) must not mix with refrigerant R22 or air, except refrigerant R410A. If air is mixed in, the system capacity will reduce, causing abnormal high pressure in the refrigeration system that may lead to copper tube breaking and failure to occur.
