

Programmable Digital Thermostat

Product Information

Honeywell Home

FocusPRO 6000 Series

Thermostat controls

Function buttons

Press to select the function displayed just above each button. (Functions change depending on the task.)

Display screen

Low battery warning

Current inside temperature

Press the **SET** button to change:

Clock: Current time.

Days: Current day.

Schedule: Current thermostat program schedule.

Press the **FAN** button to select:

Auto: Fan runs only when heating or cooling system is on.

On: Fan runs continuously.

Program Schedule

You can program four time periods each day, with different settings for weekdays and weekends. We recommend the pre-set settings (shown in the table below), since they can reduce your heating/cooling expenses.

Wake - Set to the time you awaken and the temperature you want during the morning, until you leave for the day.

Leave - Set to the time you leave home and the temperature you want while you are away (usually an energy-saving level).

Return - Set to the time you return home and the temperature you want during the evening, until bedtime.

Sleep - Set to the time you go to bed and the temperature you want overnight (usually an energy-saving level).

NOTE: Leave and Return periods can be canceled on weekends.

	Heat	Cool
Wake (6:00 am)	70°	75°
Leave (8:00 am)	62°	83°
Return (6:00 pm)	70°	75°
Sleep (10:00 pm)	62°	78°

To adjust program schedules

1. Press **SET CLOCK/DAY/SCHEDULE**, then **SET SCHEDULE**.
2. Press **▲** or **▼** to set your weekday Wake time (Mon-Fri), then press **NEXT**.
3. Press **▲** or **▼** to set the temperature for this time period, then press **NEXT**.
4. Set time and temperature for the next time period (Leave). Repeat steps 2 and 3 for each weekday time period.
5. Press **NEXT** to set weekend time periods (Sat-Sun), then press **DONE** to save & exit.

NOTE: Make sure the thermostat is set to the system you want to program (Heat or Cool).

NOTE: You can press **CANCEL PERIOD** to eliminate unwanted time periods (except Wake).

Program schedule override (temporary)

Press **▲** or **▼** to immediately adjust the temperature. This will temporarily override the temperature setting for the current time period.

The new temperature will be maintained only until the next programmed time period begins. For example, if you

want to turn up the heat early in the morning, it will automatically be lowered later, when you leave for the day.

To cancel the temporary setting at any time, press **SUN SCHEDULE**.

NOTE: Make sure the thermostat is set to the system you want to control (heat, cool or auto).

Product Manuals

Search online for **Resideo 69-1921EFS** for the User's Guide.

CAUTION

Equipment damage hazard

To prevent possible compressor damage, do not operate cooling system when outdoor temperature is below 50°F (10°C).
