#### Physics I Honors: Chapter 14 Practice Test - Refraction of Light

#### Multiple Choice

Identify:	the letter	of the	choice.	char b	test comp	detes M	he statement	or amorners	the guestion.

<ul> <li>a. glass c. area b. medium d. boundary</li> <li>2. Which is an example of refraction? <ul> <li>a. A parabolic mirror in a headlight focuses light into a beam.</li> <li>b. A fish appears closer to the surface of the water than it really is when observed from a riverbank.</li> <li>c. In a mirror, when you lift your right arm, the left arm of your image is raised.</li> <li>d. Light is beant slightly around corners.</li> </ul> </li> <li>3. When light passes at an angle to the normal from one masterial into another material in which its speed is lower, <ul> <li>a. it is bent toward the normal to the surface.</li> <li>b. it always lies along the normal to the surface.</li> <li>c. it is unaffected.</li> <li>d. it is bent away from the normal to the surface.</li> </ul> </li> <li>4. When a light ray moves from air into glass, which has a higher index of refraction, its path is a bent toward the normal.  <ul> <li>c. parallel to the normal.</li> <li>d. not bent.</li> </ul> </li> <li>5. When a light ray passes from zircon (n = 1.923) into fluorite (n = 1.434) at an angle of 60°, its path is a bent toward the normal.</li> <li>d. not bent.</li> <li>e. parallel to the normal.</li> <li>d. parallel to the normal.</li> <li>d. not bent.</li> </ul> <li>6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction?  <ul> <li>a. 12°</li> <li>b. 23°</li> <li>c. 42°</li> </ul> </li> <li>7. Carbon tetrachloride (n = 1.46) is poured into a container made of crown glass (n = 1.52). If a light ray in the plass is incident on the glass-to-liquid boundary and makes an angle of 30.0° with the normal, what is the angle of the corresponding refracted ray with respect to the normal?  <ul> <li>a. 25.6°</li> <li>b. 23.7°</li> <li>d. 64.4°</li> </ul> </li> <li>8. What type of image is formed when rays of light actually intersect?  <ul> <li>a. real</li> <li>b. virtual</li> <li>d. projected</li> </ul> </li> <li>9. In what direction does a par</li>		1.	Refraction is the bending of a wave disturbance as	it passes at an angle from one into another.								
<ol> <li>Which is an example of refraction?         <ul> <li>A parabolic mirror in a headlight focuses light into a beam.</li> <li>A parabolic mirror in a headlight focuses light into a beam.</li> <li>A parabolic mirror in a headlight focuses light into a beam.</li> <li>A parabolic mirror in a headlight focuses light into a beam.</li> <li>A parabolic mirror in a headlight focuses light into another material in which its speed is the parabolic into a mirror.</li> <li>Light is bent slightly around corners.</li> </ul> </li> <li>When light passes at an angle to the normal form one material into another material in which its speed is lower.</li> <li>Light ray moves from a surface.</li> <li>Li is what feeted.</li> <li>Li is bent away from the normal to the surface.</li> <li>When a light ray moves from air into glass, which has a higher index of refraction, its path is a bent toward the normal.</li> <li>Li bent away from the normal.</li> <li>Markon a light ray passes from zircon (n = 1.923) into floorite (n = 1.434) at an angle of 60°, its path is a bent toward the normal.</li> <li>Le parallel to the normal.</li> <li>Dent away from the normal.</li> <li>Li bent toward the normal.</li> <li>Li bent away from the normal.</li> <li>Li bent toward the normal.</li> <li>Li bent toward the normal</li></ol>			a. glass c.	area								
<ul> <li>a. A parabolic mirror in a headlight focuses light into a beam.</li> <li>b. A fish appears closer to the surface of the water than it really is when observed from a riverbank.</li> <li>c. In a mirror, when you lift your right arm, the left arm of your image is raised.</li> <li>d. Light is bent slightly around corners.</li> <li>3. When light passes at an angle to the normal from one material into another material in which its speed is lover.</li> <li>a. it is bent toward the normal to the surface.</li> <li>b. it always lies along the normal to the surface.</li> <li>d. it is bent away from the normal to the surface.</li> <li>d. it is bent away from the normal to the surface.</li> <li>4. When a light ray moves from air into glass, which has a higher index of refraction, its path is a bent toward the normal.</li> <li>d. not bent.</li> <li>5. When a light ray passes from zircon (n = 1.923) into fluorite (n = 1.434) at an angle of 60°, its path is a bent toward the normal.</li> <li>d. not bent.</li> <li>6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction?</li> <li>a. 12°</li> <li>b. 23°</li> <li>c. 42°</li> <li>b. 23°</li> <li>d. 57°</li> <li>7. Carbon tetrachloride (n = 1.46) is poured into a container made of crown glass (n = 1.52). If a light ray in the glass is incident on the glass-to-liquid boundary and makes an angle of 30.0° with the normal, what is the angle of the corresponding refracted ray with respect to the normal?</li> <li>a. 25.6°</li> <li>b. 28.7°</li> <li>d. 64.4°</li> <li>b. 19.8.7°</li> <li>d. 64.4°</li> <li>b. 19.9.8</li> <li>b. 19.9.9</li> <li>c. areal</li> <li>c. curved</li> <li>b. virtual</li> <li>d. projected</li> <li>l. what direction does a parallel ray from an object proceed after passing through a diverging lens?</li> <li>a. The ray passes through the center of the lens.</li> <li>c. The ray passes through the focal point, F.</li> <li>b. The ray passes through the fecal point, F</li></ul>			b. medium d.	boundary								
<ul> <li>b. A fish appears closer to the surface of the water than it really is when observed from a riverbank.</li> <li>c. In a mirror, when you lift your right arm, the left arm of your image is raised.</li> <li>d. Light is bent slightly around corners.</li> <li>3. When light passes at an angle to the normal from one material into another material in which its speed is lower.</li> <li>a. it is bent toward the normal to the surface.</li> <li>b. it always lies along the normal to the surface.</li> <li>c. it is unaffected.</li> <li>d. it is bent away from the normal to the surface.</li> <li>4. When a light ray moves from air into glass, which has a higher index of refraction, its path is a bent toward the normal.</li> <li>c. parallel to the normal.</li> <li>b. bent away from the normal.</li> <li>d. not bent.</li> <li>5. When a light ray passes from zircon (n = 1.923) into fluorite (n = 1.434) at an angle of 60°, its path is a bent toward the normal.</li> <li>d. not bent.</li> <li>6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction?</li> <li>a. 12°</li> <li>c. 42°</li> <li>b. 23°</li> <li>7. Carbon tetrachloride (n = 1.46) is poured into a container made of crown glass (n = 1.52). If a light ray in the glass is incident on the glass-to-liquid boundary and makes an angle of 30.0° with the normal, what is the angle of the corresponding refracted ray with respect to the normal?</li> <li>a. 25.6°</li> <li>b. 28.7°</li> <li>d. 64.4°</li> <li>8. What type of image is formed when rays of light actually intersect?</li> <li>a. real</li> <li>b. virtual</li> <li>d. 64.4°</li> <li>9. In what direction does a parallel ray from an object proceed after passing through a diverging lens?</li> <li>a. The ray passes through the center of the lens.</li> <li>c. The ray passes through the focal point, F.</li> <li>b. The ray passes through the focal point, F.</li> <li>b. The ray passes through the focal point, F.</li> <li>b. The ray</li></ul>		2.5	Which is an example of refraction?									
riverbank. c. In a mirror, when you lift your right arm, the left arm of your image is raised. d. Light is bent slightly around corners.  3. When light passes at an angle to the normal from one material into another material in which its speed is lower. a. it is bent toward the normal to the surface. b. it always lies along the normal to the surface. d. it is bent away from the normal to the surface. d. it is bent away from the normal. c. parallel to the normal. b. bent away from the normal. d. not bent.  5. When a light ray passes from zircon (n = 1.923) into fluorite (n = 1.434) at an angle of 60°, its path is a bent toward the normal. b. bent away from the normal. c. parallel to the normal. b. bent away from the normal. d. not bent.  6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction? a. 12° b. 23° c. 42° b. 23° c. Carbon tetrachloride (n = 1.46) is poured into a container made of crown glass (n = 1.52). If a light ray in the glass is incident on the glass-to-liquid boundary and makes an angle of 30.0° with the normal, what is the angle of the corresponding refracted ray with respect to the normal? b. 28.7° c. 21.4° b. 28.7° d. 64.4° what type of image is formed when rays of light actually intersect? a. real b. virtual d. projected lin what direction does a parallel ray from an object proceed after passing through a diverging lens? a. The ray passes through the center of curvature, C. b. The ray passes through the center of the lens. d. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens.			<ol> <li>A parabolic mirror in a headlight focuses light into a beam.</li> </ol>									
c. In a mirror, when you lift your right arm, the left arm of your image is raised.  d. Light is bent slightly around corners.  3. When light passes at an angle to the normal from one material into another material in which its speed is lower.  a. it is bent toward the normal to the surface.  b. it always lies along the normal to the surface.  c. it is unaffected.  d. it is bent away from the normal to the surface.  4. When a light ray moves from air into glass, which has a higher index of refraction, its path is a bent toward the normal.  b. bent away from the normal.  c. parallel to the normal.  b. bent away from the normal.  d. not bent.  5. When a light ray passes from zircon (n = 1.923) into fluorite (n = 1.434) at an angle of 60°, its path is a bent toward the normal.  d. not bent.  6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction?  a. 12°  b. 23°  7. Carbon tetrachloride (n = 1.46) is poured into a container made of crown glass (n = 1.52). If a light ray in the glass is incident on the glass-to-liquid boundary and makes an angle of 30.0° with the normal, what is the angle of the corresponding refracted ray with respect to the normal?  a. 25.6°  b. 28.7°  d. 64.4°  8. What type of image is formed when rays of light actually intersect?  a. real  b. virtual  d. projected  In what direction does a parallel ray from an object proceed after passing through a diverging lens?  a. The ray passes through the center of the lens.  d. The ray passes through the center of the lens.  c. The ray passes through the center of the lens.  c. The ray passes through the focal point, F.  b. The ray passes through the center of the lens.  c. The ray passes through the focal point, F.  b. The ray passes through the center of the lens.  c. The ray passes through the focal point, F.  b. The ray passes through the center of the lens.

c. it is unaffected. d. it is bent away from the normal to the surface.  4. When a light ray moves from air into glass, which has a higher index of refraction, its path is a. bent toward the normal. b. bent away from the normal. c. parallel to the normal. b. bent away from the normal. d. not bent.  5. When a light ray passes from zircon (n = 1.923) into fluorite (n = 1.434) at an angle of 60°, its path is a. bent toward the normal. c. parallel to the normal. b. bent away from the normal. c. parallel to the normal. b. bent away from the normal. c. parallel to the normal. c. parallel to the normal. d. not bent.  6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction? a. 12° b. 23° c. 42° d. 57° 7. Carbon tetrachloride (n = 1.46) is poured into a commainer made of crown glass (n = 1.52). If a light ray in the glass is incident on the glass-to-liquid boundary and makes an angle of 30.0° with the normal, what is the angle of the corresponding refracted ray with respect to the normal? a. 25.6° c. 31.4° b. 28.7° d. 64.4°  8. What type of image is formed when rays of light actually intersect? a. real b. virtual d. projected  9. In what direction does a parallel ray from an object proceed after passing through a diverging lens? a. The ray passes through the center of curvature, C. b. The ray passes through the center of the lens. d. The ray passes through the focal point, F. b. The ray passes through the focal point, F. b. The ray passes through the center of the lens. c. The ray passes through the focal point, F. b. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray passes through the center of the lens. c. The ray pas			<ul> <li>a. it is bent toward the normal to the surface.</li> </ul>									
d. it is bent away from the normal to the surface.  4. When a light ray moves from air into glass, which has a higher index of refraction, its path is a bent toward the normal.  5. bent away from the normal.  6. not bent.  5. When a light ray passes from zircon (n = 1.923) into fluorite (n = 1.434) at an angle of 60°, its path is a bent toward the normal.  6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction?  6. A beam of light in air is incident at an angle of 35° to the surface of a rectangular block of clear plastic (n = 1.49). What is the angle of refraction?  6. A 23°  7. Carbon tetrachloride (n = 1.46) is poured into a container made of crown glass (n = 1.52). If a light ray in the glass is incident on the glass-to-liquid boundary and makes an angle of 30.0° with the normal, what is the angle of the corresponding refracted ray with respect to the normal?  6. 31.4°  8. What type of image is formed when rays of light actually intersect?  8. curved  9. In what direction does a parallel ray from an object proceed after passing through a diverging lens?  a. The ray passes through the center of curvature, C.  b. The ray passes through the center of curvature, C.  10. In what direction does a focal ray from an object proceed after passing through a diverging lens?  a. The ray passes through the center of the lens.  d. The ray passes through the focal point, F.  10. In what direction does a focal ray from an object proceed after passing through a diverging lens?  a. The ray passes through the center of the lens.  c. The ray passes through the center of the lens.  c. The ray passes through the center of the lens.  c. The ray passes through the center of the lens.  c. The ray passes through the center of the lens.  c. The ray passes through the center of the lens.			b. it always lies along the normal to the surface.

#### **Honors Physics Chapter 14 Test Introduction**

In todays digital age, the availability of Honors Physics Chapter 14 Test books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Honors Physics Chapter 14 Test books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Honors Physics Chapter 14 Test books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Honors Physics Chapter 14 Test versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Honors Physics Chapter 14 Test books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether youre a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Honors Physics Chapter 14 Test books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Honors Physics Chapter 14 Test books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from

the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Honors Physics Chapter 14 Test books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Honors Physics Chapter 14 Test books and manuals for download and embark on your journey of knowledge?

#### **FAQs About Honors Physics Chapter 14 Test Books**

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Honors Physics Chapter 14 Test is one of the best book in our library for free trial. We provide copy of Honors Physics Chapter 14 Test in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Honors Physics Chapter 14 Test. Where to download Honors Physics Chapter 14 Test online for free? Are you looking for Honors Physics Chapter 14 Test PDF? This is definitely going to save you time and cash in something you should think about.
