The sample essay on Conversation Essay Example deals with a framework of research-based facts, approaches, and arguments concerning this theme. To see the essay's introduction, body paragraphs and conclusion, read on.

On the other hand, Stefanos and Angeliki, kinesthetic learners that collaborated in the non-computer based approach, helped each other in a bigger degree during the construction of the model, since they were familiar on working with materials and they both had the chance experimenting with the materials. This reinforces Fleming's (2008) suggestion that kinesthetic learners have experience and feel comfortable in the science lab. Still, in some cases Stefanos handled the materials for longer and Angeliki was just helping by bringing the appropriate materials for the development of the model.

Stefanos: No Angeliki is not like that, let me do it. I have used this tool again and I can manage better. Go fetch the 'globe' and the 'Sun', please. Angeliki: Ok, I am going but then I want to try too! You shouldn't do everything by yourself! The teacher said that both together have to develop the model. Stefanos: Ok, I will let you do the next thing! The above conversations indicate that there were factors that influenced the teaching process and weren't strictly related with students' learning styles, but with students' experiences, as Milgram (2007) suggests too. Boys in both situations tended to dominate girls, while this was more obvious in the computer-based approach. That is due to the fact that boys, as Milgram's (2007) also suggests, have more experience with the hand-on lab equipment than girls, something that was observed occurring in the present study in the computer and the science lab.

As it concerns the students that had visual learning preferences and worked in the two groups different characteristics of the two learning approaches revealed to benefit them. Specifically, the fact that Stagecast Creator is a program that uses images for creating rules and doesn't require a programming language was very supportive for Katerina and George (visual learners), since they could easily express their understandings through images.

However, students were considering their animations as exact representations of reality, something that Osborne and Henessy (2003) also supported, so they were trying to create a model that was representing the phenomenon. Still, the group of visual learners that participated in the non computer-based teaching approach found some difficulties on developing a model, since they could visualize how they wanted their model to look like by seeing all the materials available to them, but in the practice they found difficulties in actually doing what they wished.

Moreover, the two teaching approaches revealed to promote in a big degree the conversations between students with auditory strengths. In both groups, th
