Applying Mind Genomics to Social Sciences Kover, Arthur, Papajorgji, Petraq, Moskowitz, Howard, 2022-05-13 Mind genomics is the next level of apprehension of human behavior. It seeks to comprehend what drives consumers and people in general in their day to day decision making. It reaches out where surveys and focus groups are inadequate tools to help us better understand how people feel and how they will behave in a particular situation. While allowing for a more encapsulating method that works well with big data, mind genomics offers a more nuanced view of the complex societal and political reality. Applying Mind Genomics to Social Sciences presents an overview of mind genomics as applied to the food industry, commerce, business services, tourism, healthcare, and even legal service. Its focus, however, explores the new avenues of mind genomics in social and political sciences. The book offers a combination of rich data combined with a new methodological approach and fresh analytical insights which helps us better grasp and understand the complex reality of society. Covering topics such as human thought, decision making, and cognitive science, this premier reference source is a dynamic resource for political scientists, sociologists, psychologists, business leaders, marketers, government officials, journalists, students, and faculty of higher education, libraries, doctoral and postdoctoral candidates, researchers, and academicians. *Debates of the Transkei Legislative Assembly* Transkei (South Africa). Legislative Assembly, 1976-03 Concept and Application of Transdisciplinarity in Intellectual Discourse and Research Hester du Plessis, Jeffrey Sehume, Leonard Martin, Mapungubwe Institute for Strategic Reflection (MISTRA), 2014-02-01 In the past four decades, transdisciplinarity has gained conceptual and practical traction for its transformative value in accounting for the complex challenges besetting humankind, including social relations and natural ecosystems. The need to develop frameworks for joint problem solving involving diverse stakeholders is unquestionable. Besides generating inclusivity which embraces academia, civil society, and policymakers in the public and private sectors, transdisciplinarity allows for the appreciation of phenomena from a multiplicity of angles and affords societies creative ways of seeking solutions to challenges that may appear intractable. This book puts forward alternatives within this arena and attempts to directly respond to the multilayered challenges of diffuse disciplines, interlinked socioeconomic problems, impacts of globalization, technological advancements, environmental concerns, food security, and more. **The Concept and Application of Transdisciplinarity in Intellectual Discourse and Research** MISTRA, 2011-06-09 Mapungubwe Institute for Strategic Reflection. MISTRA was publicly launched as a think tank in March 2011 and took up the task of following a transdisciplinary approach to the research generated within the organisation. The projects initiated by MISTRA integrate various streams of knowledge and expertise when examining complex issues such as nation formation, economic growth, social equity, adaptable science and technology, and other strategic topics related to South Africa's development as a democracy. Serving in part as an intellectual movement and in part as a research institution, activities are structured around diverse topics that require the opening up of intellectual space for strategic research and reflection.

specific but not exclusive to the African continent A project was launched The concept and application of transdisciplinarity in intellectual discourse and research The intent of the study was two fold in the first place the need for better theoretical understanding of a transdisciplinarity approach was identified as a necessity and in the second place MISTRA intended to apply transdisciplinarity towards the opening up of an African approach guided in part by the Afrikology principles of the late Professor Dani Nabudere By orientation Transdisciplinarity is an approach that recognises a united and borderless intellectual terrain It is an attempt to formulate an integrative process of knowledge production and distribution in reaction to the twentieth century narrow discipline focus and hyper specialisation It responds to the multi layered challenges of diffused disciplines interlinked socio economic problems the impact of globalisation the de terretorialised nation state technological advancements environmental concerns agriculture and food security and health And it recognises that in history some of the most revolutionary breakthroughs in science and technology in fact happened on the margins of narrow disciplines
