Processing, Networking and Computers Yue Wang, Yuyang Liu, Jiaqi Zou, Mengyao Huo, 2023-02-23 This book collects selected papers from the 10th Conference on Signal and Information Processing Networking and Computers held in Xi Ning China held in July 2022 The book focuses on the current works of information theory communication system computer science aerospace technologies and big data and other related technologies People from both academia and industry of this field can contribute and find their interests from the book The Virtual Weapon and International Order Lucas Kello, 2017-09-26 An urgently needed examination of the current cyber revolution that draws on case studies to develop conceptual frameworks for understanding its effects on international order The cyber revolution is the revolution of our time The rapid expansion of cyberspace brings both promise and peril It promotes new modes of political interaction but it also disrupts interstate dealings and empowers non state actors who may instigate diplomatic and military crises Despite significant experience with cyber phenomena the conceptual apparatus to analyze understand and address their effects on international order remains primitive Here Lucas Kello adapts and applies international relations theory to create new ways of thinking about cyber

strategy Kello draws on a broad range of case studies including the Estonian crisis the Olympic Games operation against Iran and the cyber attack against Sony Pictures Synthesizing qualitative data from government documents forensic reports of major incidents and interviews with senior officials from around the globe this important work establishes new conceptual benchmarks to help security experts adapt strategy and policy to the unprecedented challenges of our times The Belt and Road Initiative and the Future of Regional Order in the Indo-Pacific Nick Bisley, Michael Clarke, Matthew Sussex, 2020-01-20 The Belt and Road Initiative BRI is emerging as a vital lynch pin in China's efforts to establish a maritime and continental zone of influence in the Indo Pacific region The Belt and Road Initiative and the Future of Regional Order in the Indo Pacific interrogates to what extent BRI represents an achievable vision of a China centric order in Asia and explores its major security implications for the region The contributions to this volume provide up to date analysis of the effect of BRI on the region's foreign policy and alliance patterns its connection to geo economics and domestic Chinese politics and the policy responses of key Indo Pacific actors While acknowledging that BRI remains prey to a variety of internal and exogenous shocks the contributors conclude that at the very least BRI will continue to disrupt the existing alignments of economic and strategic interests in the Indo Pacific and that on this minimal basis BRI will likely be judged a success by China For regional actors however the BRI simultaneously enhances choice while presenting strategic and economic risks of greater dependency on China a dilemma intensified by the disruptive effects of the Trump administration on regional confidence in the longevity of American commitments and leadership **Far Eastern Economic Review**, 2001 Parliamentary Debates (Hansard).
