Blood Cells Barbara J. Bain, 2008-04-15 Blood Cells has been written with both the practising haematologist and the trainee in mind It aims to provide a guide for use in the diagnostic haematology laboratory covering methods of collection of blood specimens blood film preparation and staining the principles of manual and automated blood counts and the assessment of the morphological features of blood cells The practising haematologist should find this book sufficiently comprehensive to be a reference source while at the same time the trainee haematologist and biomedical scientist should find it a straightforward and practical bench manual Enables both the haematologist and laboratory scientist to identify blood cell features from the most common to the more obscure Provides essential information on methods of collection blood film preparation and staining together with the principles of manual and automated blood counts Completely revised and updated incorporating much newly published information now includes advice on further tests when a specific diagnosis is suspected Four hundred high quality photographs to aid with blood cell identification Highlights the purpose and clinical relevance of haematology laboratory tests throughout
