Risk Management Series; Design Guide for Improving Critical Facility Safety from Flooding and High Winds , Climate Adaptation Engineering Emilio Bastidas-Arteaga, Mark G. Stewart, 2019-03-16 Climate Adaptation

Engineering defines the measures taken to reduce vulnerability and increase the resiliency of built infrastructure. This includes enhancement of design standards, structural strengthening, utilisation of new materials, and changes to inspection and maintenance regimes, etc. The book examines the known effects and relationships of climate change variables on infrastructure and risk management policies. Rich with case studies, this resource will enable engineers to develop a long-term self-sustained assessment capacity and more effective risk management strategies. The book's authors also take a long-term view dealing with several aspects of climate change. The text has been written in a style accessible to technical and non-technical readers with a focus on practical decision outcomes. Provides climate scenarios and their likelihoods, hazard modelling, wind, flood, heatwaves, etc. infrastructure vulnerability, resilience, or exposure, likelihood and extent of damage. Introduces the key concepts needed to assess the risks, costs, and benefits of future proofing infrastructures in a changing climate. Includes case studies authored by experts from around the world.

Handbook of Disaster Research Havidán Rodríguez, William Donner, Joseph E. Trainor, 2017-11-16. This timely Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research. It provides an interdisciplinary approach to disasters with theoretical, methodological, and practical applications. Attention is given to conceptual issues dealing with the concept of disaster and to methodological issues relating to research on disasters. These include Geographic Information Systems as a useful research tool and its implications for future research. This seminal work is the first interdisciplinary collection of disaster research as it stands now while outlining how the field will continue to grow. *Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 1993* United States.
