Lard's Quarterly Moses E. Lard, 1864 **The Evangelical Repository**, 1865 Inspire Responsibly Marie Schwimmer, 2024-03-07 Aspirational talk has gained increasing research attention as a compelling concept theoretically explaining the potential of talk-action discrepancies in corporate responsibility communication to instigate organizational change. Under certain conditions, aspirational talk can facilitate discourse, agreement, reframing, and corporate reflexivity. However, perceived talk-action discrepancies can negatively affect organizational members, leading to disengagement and demotivation, causing emotional exhaustion, exposing employees to vulnerabilities, and even catalyzing unethical or illicit behaviors. Thus, this book focuses on how aspirational talk becomes irresponsible in an organizational context and how it can be avoided. The author proposes that aspirational talk becomes irresponsible if it creates expectations that lead to illegitimate harm to employees or involved stakeholders. A framework is derived constituting the finding that it takes two types of investments into performativity and responsibility conditions to avoid the irresponsible use of aspirational talk and thus to inspire responsibly. **Inspiration** Rajesh Aggarwal, 2021-11-25 Rajesh Aggarwal is a renowned Motivational Speaker, Business Thinker. Inspiration Gerald O'Collins, 2018-06-21 Inspiration Towards a Christian Interpretation of Biblical Inspiration anchors its study of inspiration firmly in the Scriptures and examines the inspired nature of the Bible and its inspiring impact Gerald O Collins begins by examining classical view of inspiration expounded by Karl Barth and Raymond Collins He takes up the inspired origin of the Old Testament where earlier books helped to inspire later books before moving to the New Testament which throughout shows the inspiring impact of the inherited Scriptures both in direct citations and in many echoes The work then investigates the Bible s inspiring influence on Christian worship preaching teaching the visual arts literature and life After a chapter that clarifies the interrelationship between divine revelation tradition and inspiration

two chapters expound ten characteristics of biblical inspiration with special emphasis on the inspiring quality of the Bible O Collins explains a major consequence of inspiration biblical truth and the grounds on which the Church canonized the Scriptures After spelling out three approaches to biblical interpretation the authorial intention the role of readers and the primacy of the text itself the book ends by setting out ten principles for engaging theologically with the Scriptures An epilogue highlights two achievements of the book By carefully distinguishing inspiration from divine revelation and biblical truth it can deliver readers from false problems This work also underlines the inspiring effects of the Scriptures as part of the Holy Spirit s work of inspiration Biomimetic Research for Architecture and Building Construction Jan Knippers, Klaus G. Nickel, Thomas Speck, 2016-12-19 This book comprises a first survey of the Collaborative Research Center SFB TRR 141 Biological Design and Integrative Structures Analysis Simulation and Implementation in Architecture funded by the Deutsche Forschungsgemeinschaft since October 2014 The SFB TRR 141 provides a collaborative framework for architects and engineers from the University of Stuttgart biologists and physicists from the University of Freiburg and geoscientists and evolutionary biologists from the University of Tübingen The program is conceptualized as a dialogue between the disciplines and is based on the belief that that biomimetic research has the potential to lead everyone involved to new findings far beyond his individual reach During the last few decades computational methods have been introduced into all fields of science and technology In architecture they enable the geometric differentiation of building components and allow the fabrication of porous or fibre based materials with locally adjusted physical and chemical properties Recent developments in simulation technologies focus on multi scale models and the interplay of mechanical phenomena at various hierarchical levels In the natural sciences a multitude of quantitative methods covering diverse hierarchical levels have been introduced These advances in computational methods have opened a new era in biomimetics local differentiation at various scales the main feature of natural constructions can for the first time not only be analysed but to a certain extent also be transferred to building construction Computational methodologies enable the direct exchange of information between fields of science that until now have been widely separated As a result they lead to a new approach to biomimetic research which hopefully contributes to a more sustainable development in architecture and building construction Elements of Theology, Natural and Revealed James Harris Fairchild, 1892
