All questions carry equal marks

1. The distance between Hyderabad and Suryapet is 180 Km. A bus covers this distance in 6 hours. Construct a plain scale to time upto a single minute. The R.F. of the scale is $1/200000$. Find the distance covered by the bus in 36 minutes. [25]
2. The front view of a 75 mm long line measures 55 mm. The line is parallel to the H.P. and one of its ends is in the V.P. and 25 mm above the H.P. Draw the projections of the line and determine its inclination with the V.P. [25]
3. Draw the projections of a regular pentagon of 40 mm side, having its surface inclined at 30° to the H.P. and a side parallel to the H.P. and inclined at an angle of 60° to the V.P. [25]
4. A square pyramid, base 50 mm side and axis 75 mm long, is resting on the H.P. On one of its triangular faces, the top view of the axis making an angle of 30° with the V.P. It is cut by a horizontal section plane, the V.T. of which intersects the axis at a point 6 mm from the base. Draw the front view, sectional top view and the development of the sectioned pyramid. [25]
5. Draw the a) front view b) side view c) top view as shown in figure 1. All dimensions are in mm. [10+5+10]

Model Question Paper Engineering Drawing:

Geometric and Engineering Drawing Ken Morling, 2012 For all students and lecturers of basic engineering and technical drawing The new edition of this successful text describes all the geometric instructions and engineering drawing information likely to be needed by anyone preparing or interpreting drawings or designs There are also plenty of exercises to practise these principles

ENGINEERING GRAPHICS JOHN, K. C., 2009-07-13 This book provides a detailed study of geometrical drawing through simple and well explained worked out examples and exercises This book is designed for students of first year Engineering Diploma course irrespective of their branches of study The book is divided into seven modules Module A covers the fundamentals of manual drafting lettering freehand sketching and dimensioning of views Module B describes two dimensional drawings like geometrical constructions conics miscellaneous curves and scales Three dimensional drawings such as projections of points lines plane lamina geometrical solids and their different sections are well explained in Module C Module D deals with intersection of surfaces and their developments Drawing of pictorial views is illustrated in Module E which includes isometric projection oblique projection and perspective projections The fundamentals of machine drawing are covered in Module F Finally in Module G the book introduces computer aided drafting CAD to make the readers familiar with the state of the art techniques of drafting

KEY FEATURES Follows the International Standard Organization ISO code of practice for drawing Includes a large number of dimensioned illustrations worked out examples and Polytechnic questions and answers to explain the geometrical drawing process Contains chapter end exercises to help students develop their drawing skills

Engineering Drawing with CAD Applications O. Ostrowsky, 2019-10-25 Engineering Drawing with CAD Applications is ideal for any engineering student needing a user friendly step by step guide to draughting sketching and drawing Fully revised to take into account developments in computer aided drawing and to keep up with British Standards this guide remains an ideal introduction to the subject It provides readers with the basic knowledge and skills of draughting and takes them on to more interesting and advanced engineering drawing techniques and procedures This latest revision of Ostrowsky's popular Engineering Drawing represents a

comprehensive introductory course in engineering drawing and sketching and is suitable for a wide range of college and university engineering students. The author concentrates on the techniques fundamental to effective drawing, key knowledge that is needed whether the drawings are carried out by hand or via a CAD package. Copious illustrations and a clear step by step approach make this book ideal for distance learning and assignment based study. *Engineering Workshop Drawing* Henry John Spooner, 1914

BTEC First Engineering Mike Tooley, 2010-08-20 A clearly written and easily accessible textbook that encourages independent study covering all the core material required for the BTEC First Certificate and Diploma. Knowledge check questions and activities are included throughout along with review questions and worked mathematical examples all of which relate to real world engineering contexts. Students will gain a valuable insight into various areas of engineering technology and related industries providing a potential springboard to further training qualifications or suitable employment. For those students wishing to progress to BTEC National this textbook covers all the vital material required as a prerequisite to NVQ Level 3. New in this edition. Updated in line with the 2010 changes to the BTEC First specifications. Includes detailed information on assessment featuring example questions and answers. Layout and design changes provide extra clarity.

Technical Drawing with Engineering Graphics Frederick E. Giesecke, Shawna Lockhart, Marla Goodman, Cindy M. Johnson, 2023-02-16 This full color text offers a clear complete introduction and detailed reference for creating 3D models and 2D documentation drawings. Building on its reputation as a trusted reference, this edition expands on the role that 3D CAD databases now play in design and documentation. Superbly integrated illustrations, text, step by step instructions and navigation make it easier than ever to master key skills and knowledge. Throughout the authors demonstrate 3D and 2D drawing skills and CAD usage in real world work practice in today's leading disciplines. They combine strong technical detail, real world examples and current standards, materials, industries and processes all in a format that is efficient, colorful and visual. Features: Splash Spread: Appealing chapter opener provides context and motivation. References and Web Links: Useful weblinks and standards provided upfront in each chapter. Understanding Section: Foundational introductions tabbed for easy navigation, outline each topic's importance, use visualization tips and theory. Detail Section: Detailed, well tested explanations of drawing techniques, variations and examples organized into quick read sections numbered for easy reference. CAD at Work Section: Breakout pages offer tips on generating drawings from 2D or 3D models. Portfolio Section: Examples of finished drawings show how techniques are applied in the real world. Key Words: Italicized on first reference, summarized after each chapter. Chapter Summaries and Review Questions: Efficiently reinforce learning. Exercises: Outstanding problem sets with updated exercises including parts assembly drawings from CAD models, sketching problems and orthographic projections.

Engineering Drawing & Basic Science YCT Expert Team, 2023-24 RRB ALP Technician Stage II Engineering Drawing Basic Science *Engineering Drawing for Manufacture* Brian Griffiths, 2002-10-01 The processes of manufacture and assembly are based on the communication of engineering information via drawing. These

drawings follow rules laid down in national and international standards The organisation responsible for the international rules is the International Standards Organisation ISO There are hundreds of ISO standards on engineering drawing because drawing is very complicated and accurate transfer of information must be guaranteed The information contained in an engineering drawing is a legal specification which contractor and sub contractor agree to in a binding contract The ISO standards are designed to be independent of any one language and thus much symbology is used to overcome any reliance on any language Companies can only operate efficiently if they can guarantee the correct transmission of engineering design information for manufacturing and assembly This book is a short introduction to the subject of engineering drawing for manufacture It should be noted that standards are updated on a 5 year rolling programme and therefore students of engineering drawing need to be aware of the latest standards This book is unique in that it introduces the subject of engineering drawing in the context of standards

Marine Engineering ,1900 *Power* ,1895 **Power and the Engineer** ,1898 *Engineering Education* John Heywood,2005-12-12 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author s first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum s internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation
