

Energy Storage and Transfer Model Worksheet 3: Quantitative Energy Calculations & Energy Conservation

Remembered in this section each calculation is a **model**.

1. I have made kinetic energy calculations including KE, PE, accounting for signs correctly. I used a table to organize my work.

2. I have made energy calculations including calculations of energy stored with respect to the forces involved in the situation.

3. I have used the gravitational energy of your 1 kg physics book as an illustration that when an object reaches a lower elevation:

the object is at a lower elevation, the book:

is moving faster than it was at a higher elevation, given that there

is a change in the forces of contact and force springs associated with the book. I have made energy calculations for the change.

4. I have been able to quantitatively calculate the negative change for change in kinetic energy.

5. I have made energy calculations involving a vertical mass spring system. I have used the spring constant to calculate the work done by the spring.
