The Measure of Merit John Carson, 2025-10-28 A wide ranging account of American and French understandings of merit talent and intelligence over the past two centuries How have modern democracies squared their commitment to equality with their fear that disparities in talent and intelligence might be natural persistent and consequential John Carson tells the fascinating story of how two nations wrestled scientifically with human inequalities and their social and political implications Surveying a broad array of political tracts philosophical treatises scientific works and journalistic writings Carson chronicles the gradual embrace of the IQ version of intelligence in the United States while in France the birthplace of the modern intelligence test expert judgment was consistently prized above such quantitative measures He also reveals the crucial role that determinations of and contests over merit have played in both societies they have helped to organize educational systems justify racial hierarchies classify army recruits and direct individuals onto particular educational and career paths A contribution to both the history of science and intellectual history *The Measure of Merit* illuminates the shadow languages of inequality that have haunted the American and French republics since their inceptions

Maximizing Intelligence David Armor, 2017-07-12 The nature versus nurture controversy dates back to at least the nineteenth century How much of a role does genetics or environment play in accounting for reasoning skill and other intellectual aptitudes At a time when the public school system in the United States is under attack this debate has taken center stage in arguments about what accounts for differences in academic achievement *Maximizing Intelligence* convincingly argues that while both genetics and environment play a role in a child s intelligence environmental factors especially at an early age are of primary importance Working from this premise Armor suggests how intelligence may be heightened Armor presents four propositions about intelligence His first is that intelligence exerts a major influence on educational and occupational success following a chronological sequence from a child s cognitive skills learned before school to academic success during the school years to eligibility for college His second proposition is that intelligence can be changed at least within limits There is ample evidence that a child s intelligence is not fully given at birth but continues to evolve and change at least through the early elementary school years although at a declining rate Proposition three is that intelligence is influenced by a series of risk factors and most of the influence occurs before a child reaches school age Risk factors include parent intelligence and education family income family structure and size nutrition and specific parenting behaviors The fourth proposition flows from the second and third that the most promising avenues for maximizing intelligence come from a child s parents Armor persuasively argues for a

whole family approach whereby government programs are modified or created to inform parents of risk factors and to reward behaviors that optimize positive outcomes Maximizing Intelligence is meticulously researched Pratiyogita Darpan, 2008-11 Pratiyogita Darpan monthly magazine is India's largest read General Knowledge and Current Affairs Magazine Pratiyogita Darpan English monthly magazine is known for quality content on General Knowledge and Current Affairs Topics ranging from national and international news issues personality development interviews of examination toppers articles write up on topics like career economy history public administration geography polity social environment scientific legal etc solved papers of various examinations Essay and debate contest Quiz and knowledge testing features are covered every month in this magazine *Psychological Testing and Assessment* EduGorilla Prep Experts, 2024-09-03 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Competition Science Vision**, 1999-11 Competition Science Vision monthly magazine is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India Well qualified professionals of Physics Chemistry Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to the point study material for aspiring candidates The magazine covers General Knowledge Science and Technology news Interviews of toppers of examinations study material of Physics Chemistry Zoology and Botany with model papers reasoning test questions facts quiz contest general awareness and mental ability test in every monthly issue **Competition Science Vision**, 1998-09 Competition Science Vision monthly magazine is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India Well qualified professionals of Physics Chemistry Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to the point study material for aspiring candidates The magazine covers General Knowledge Science and Technology news Interviews of toppers of examinations study material of Physics Chemistry Zoology and Botany with model papers reasoning test questions facts quiz contest general awareness and mental ability test in every monthly issue *Competition Science Vision*, 1998-12 Competition Science Vision monthly magazine is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India Well qualified professionals of Physics Chemistry Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to the point study material for aspiring candidates The magazine covers General Knowledge Science and Technology news Interviews of toppers of examinations study material of Physics Chemistry Zoology and Botany with model papers reasoning test questions facts quiz contest general awareness and mental ability test in every monthly issue **Testing in American Schools** United States.
