Researching IT in Education Anne McDougall, John Murnane, Anthony Jones, Nick Reynolds, 2010-01-21 Serious criticisms of research on IT in education have been published recently in both the UK and the USA. Researching IT in Education aims to provoke thought and discussion among practising researchers by considering a range of approaches to undertaking quality research. Establishing priorities and directions for future research in the sub-discipline of IT in education, the book is structured around five foci: theory, history, research directions, methodology, and research topics. This book argues for the enormous power of IT to enable fundamental research that both refines and develops theory and practice in education. High quality research that advances knowledge and educational practice in this area will generally require longer timelines and more complex data collection and analysis methods. The authors draw attention to the value of theoretical frameworks used in mainstream educational research and highlight the early theoretical work on the subject of IT in education. Researching IT in Education is the only book in its area to focus on methodological and research design issues. The individual chapters are contributed by expert researchers and leaders in the field from ten countries, thus providing an unusually broad but coherent international set of perspectives for the issues examined in the book. This book will benefit anyone interested in or

undertaking research on IT in education, including academics, research students, teachers, and policy makers. Progress Plain and Simple Michael Harpham, 2020-02-18 What is progress in learning? How do we see progress being made in a lesson? This book offers a fresh perspective on teaching, learning, and progress in the classroom. Written by an experienced teacher and school leader, Michael Harpham, it explores the different ways in which progress can be made in the classroom and how it can be more effectively delivered, identified, evidenced, measured, and assessed. The book provides an overview of progress in schools for both teachers and school leaders, including what is meant by progress and what it looks like in lessons, as well as its implications on assessment, leadership, and internal and external school evaluation. It offers over thirty situation-driven strategies and activities to help develop and deliver progress in and beyond the classroom, focussing on five measures: Skills, Knowledge, Accuracy, Resilience, and Independent learning. Full of tips to help improve progress in schools, this is essential reading for all teachers, school leaders, and parents. **Thirty Years of Literacies Testing at the University of Cape Town** Alan
