**The Evolution of the Global Terrorist Threat** Bruce Hoffman, Fernando Reinares, 2014-10-28. Examining major terrorist acts and campaigns undertaken in the decade following September 11 2001 internationally recognized scholars study the involvement of global terrorist leaders and organizations in these incidents and the planning organization execution recruitment and training that went into them. Their work captures the changing character of al Qaeda and its affiliates since the invasions of Afghanistan and Iraq and the sophisticated elements that despite the West's best counterterrorism efforts continue to exert substantial direction over jihadist terrorist operations. Through case studies of terrorist acts and offensives occurring both in and outside the West the volume's contributors investigate al Qaeda and other related entities as they adapted to the strategies of Operation Enduring Freedom and subsequent U.S.-led global counterterrorism programs. They explore whether Osama bin Laden was indeed reduced to a mere figurehead before his death or continued to influence al Qaeda's global activities. Did al Qaeda become a loose collection of individuals and ideas following its expulsion from Afghanistan or was it reborn as a transnational terrorist structure powered by a well articulated ideology? What is the preeminent terrorist threat we face today and what will it look like in the future? This anthology pinpoints the critical patterns and strategies that will inform counterterrorism in the coming decades.

**Intelligence and Government in Britain and the United States** Philip H.J. Davies, 2012-04-06. Bringing a dose of reality to the stuff of literary thrillers this masterful study is the first closely detailed comparative analysis

of the evolution of the modern British and American intelligence communities Intelligence and Government in Britain and the United States A Comparative Perspective is an intensive comparative exploration of the role of organizational and political culture in the development of the intelligence communities of America and her long time ally Each national system is examined as a detailed case study set in a common conceptual and theoretical framework The first volume lays out that framework and examines the U S intelligence community The second volume offers the U K case study as well as overall conclusions Particular attention is paid here to the fundamentally different concepts of what intelligence entails in the United States and United Kingdom as well as to the nations different approaches to managing change and information intensive activities The impact of these differences is demonstrated by examining the evolution of the two intelligence communities from their inceptions prior to World War II through their development during the Cold War and the transformations that have taken place since especially in the wake of the September 2001 terrorist attacks and 2003 invasion of Iraq **Intelligence**

**Information Sharing Final Report and Recommendations** , Executive Summary The National Infrastructure Advisory Council NIAC set out to determine whether the right people are receiving the right intelligence information at the right time to support robust protection and resilience of the Nation s critical infrastructure More than 200 interviews and extensive open source research uncovered a wealth of insights on this complex problem First there have been marked improvements in

the sharing of intelligence information within the Federal Intelligence Community and between the Federal Government and regions States and municipalities However this level of improvement has not been matched in the sharing of intelligence information between the Federal Government and private sector owners and operators of critical infrastructure Despite some notable successes this bi directional sharing is still relatively immature leaving a large gap between current practices and an optimal system of effective public private intelligence information sharing We observe that trust is the essential glue to make this public private system work Trust results when partner capabilities are understood and valued processes are tailored to leverage these capabilities and these processes are tested and proven valuable to all partners When breakdowns in information sharing occur it erodes trust and is counterproductive to risk management Information sharing is perhaps the most important factor in the protection and resilience of critical infrastructure Information on threats to infrastructure and their likely impact underlies nearly every security decision made by owners and operators including which assets to protect how to make operations more resilient how to plan for potential disasters when to ramp up to higher levels of security and how to respond in the immediate aftermath of a disaster We looked at intelligence information flowing from the Federal Government to critical infrastructure owners and operators as well as risk information flowing from critical infrastructure owners and operators to the government Our study reveals the complex ways information is gathered analyzed packaged and shared among government and the owners and operators of critical infrastructures In tackling this complex subject we examined the different stages of the intelligence cycle including requirements generation information collection analysis and dissemination To gather a variety of perspectives we conducted extensive interviews with security directors chief executives subject matter experts and government executives and managers Recognizing that distinct sector characteristics shape information sharing needs we conducted case studies of five sectors Commercial Facilities Healthcare and Public Health Energy Oil and Natural Gas Banking and Finance and Chemical While we found some information sharing approaches to be effective others were not As a result we adopted a capability maturity approach which acknowledges that different Federal agencies have different abilities to share information effectively and we sought to build on what is working
