Detection and Estimation of Working Memory States and Cognitive Functions Based on Neurophysiological Measures Felix Putze, Christian Mühl, Fabien Lotte, Stephen Fairclough, Christian Herff, 2019-02-05 Executive cognitive functions like working memory determine the success or failure of a wide variety of different cognitive tasks such as problem solving navigation or planning Estimation of constructs like working memory load or memory capacity from neurophysiological or psychophysiological signals would enable adaptive systems to respond to cognitive states experienced by an operator and trigger responses designed to support task performance e g by simplifying the exercises of a tutor system when the subject is overloaded or by shutting down distractions from the mobile phone The determination of cognitive states like working memory load is also useful for automated testing assessment or for usability evaluation While there exists a large body of research work on neural and physiological correlates of cognitive functions like working memory activity fewer publications deal with the application of this research with respect to single trial detection and real time estimation of cognitive functions in complex realistic scenarios Single trial classifiers based on brain activity measurements such as electroencephalography functional near infrared spectroscopy physiological signals or eye tracking have the potential to classify affective or cognitive states based upon short segments of data For this purpose signal processing and machine learning techniques need to be developed and

transferred to real world user interfaces The goal of this Frontiers Research Topic was to advance the State of the Art in signal based modeling of cognitive processes We were especially interested in research towards more complex and realistic study designs for example collecting data in the wild or investigating the interaction between different cognitive processes or signal modalities Bringing together many contributions in one format allowed us to look at the state of convergence or diversity regarding concepts methods and paradigms The Boat Electrics Bible Andy Johnson,2015-09-10 Following in the successful footsteps of the groundbreaking Boat Maintenance Bible and Boat Repair Bible this new title in this popular series of all encompassing technical reference bibles presented in an accessible modern and attractive way is sure to be the boater s godsend Electrics are a notoriously tricky aspect of boat ownership and maintenance both critical to the operation of the yacht or motorboat and prone to breaking down in the damp atmosphere and bouncy conditions This is the book that will take owners through all the likely problems and solutions including making new installations of equipment reviving an old boat and correcting electrical faults on their current craft Equally useful for yacht or motorboat owners and illustrated with helpful photos detailed close up shots step by step exploded diagrams and instructions this is a book every owner should keep aboard **Compliance and Financial Crime Risk in Banks** Sophia Beckett Velez,2024-03-25 US and global banking regulators have enforced compliance laws to minimise money laundering terrorist funding human trafficking fraudulent banking activities and bad mortgage loans that expose banks to significant risks and losses Author Sophia Beckett Velez offers an original contribution to the field of banking *Intelligent Computing* Kohei Arai,Supriya Kapoor,Rahul Bhatia,2018-11-01 This book gathering the Proceedings of the 2018 Computing Conference offers a remarkable collection of chapters covering a wide range of topics in intelligent systems computing and their real world applications The Conference attracted a total of 568 submissions from pioneering researchers scientists industrial engineers and students from all around the world These submissions underwent a double blind peer review process Of those 568 submissions 192 submissions including 14 poster papers were selected for inclusion in these proceedings Despite computer science s comparatively brief history as a formal academic discipline it has made a number of fundamental contributions to science and society in fact along with electronics it is a founding science of the current epoch of human history the Information Age and a main driver of the Information Revolution The goal of this conference is to provide a platform for researchers to present fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences This book collects state of the art chapters on all aspects of Computer Science from classical to intelligent It covers both the theory and applications of the latest computer technologies and methodologies Providing the state of the art in intelligent methods and techniques for solving real world problems along with a vision of future research the book will be interesting and valuable for a broad readership The Future of Road Transportation Jeyaprakash Natarajan,Mahendra Babu Kantipudi,Che-Hua Yang,Yaojung Shiao,2023-11-29 The Future of Road Transportation presents rapidly growing

research towards electrified and automated vehicles It explains the workings and drawbacks of a conventional vehicle s powertrain braking and steering systems before exploring ADAS equipment and driverless car technologies Emphasizing the necessary changes in conventional transport systems towards sustainable and smart mobility this book discusses advanced future mobility technologies and the challenges and considerations for developing sustainable vehicle designs It overviews the construction details and the research level contents of the power train battery charging infrastructure and other control systems of the electrical vehicles The book is intended for automotive and electrical engineers and researchers working on electric vehicle technology autonomous and automated vehicles automotive sustainability It will also be useful for mechanical and electrical engineering students taking courses in Automotive Vehicle Engineering and Automotive Systems and Design
