sample of developing countries covering the period 2000-14 we show that i average annual portfolio flows to FMs as a share of GDP outstripped those to EMs by about 0.6 percentage points of GDP ii during years of heightened stress in global financial markets portfolio flows to FMs dried up like those to EMs and that iii FMs have become more integrated into international financial markets Our findings confirm that in terms of portfolio flows FMs have become more similar to EMs than to the rest of LIDCs and are therefore more vulnerable to swings in global financial markets conditions Accordingly it is important to have in place frameworks to strengthen FMs resilience to adverse capital flows shocks **Closing the Gap**

Vicky Neale, 2017 Since 2013 mathematicians from around the world have made dramatic progress on a problem in number theory that goes back centuries the Twin Primes Conjecture which asserts that there are infinitely many pairs of prime numbers that differ by 2 for example 17 and 19 is such a pair This book describes two stories that of the recent work on the Twin Primes Conjecture and in parallel the related ideas around primes from the previous two thousand years of mathematics

**Foundations of Education: An EMS Approach** National Association of EMS Educators (NAEMSE), 2019-07-15 The evolving field of emergency medical services EMS requires professional educators who are knowledgeable about teaching and learning strategies classroom management assessment and evaluation technology in learning legal implications in education program infrastructure design and administering programs of excellence to meet state and national accreditation guidelines Foundations of Education An EMS Approach Third Edition provides EMS educators with the tools ideas and information necessary to succeed in each of these areas The content reflects how current educational knowledge and theory uniquely apply to EMS students educators and programs This textbook is used in the NAEMSE Instructor Courses and is an excellent reference for all EMS educators as well as educators in allied health professions Evidence Based Content In addition to foundational topics such as teaching philosophy and classroom management the text covers brain based learning accreditation and program evaluation emerging technologies and assessment strategies It guides educators to write objectives prepare lesson plans and deliver education in engaging ways to maximize student learning Grounded in this information EMS educators can promote effective education regardless of the type of course or setting Highlights Covers current educational theory and teaching methodologies specific to EMS Meets and exceeds the latest DOT National Guidelines for Educating EMS Instructors Offer practical advice and scenarios in the form of Teaching Tips and Case in Points *Lead Market India* Cornelius Herstatt, Rajnish Tiwari, 2016-11-26 India is still perceived by some as a developing country that has yet to create world class products of its own However this book shows that in recent years India has emerged as a lead market for frugality driven innovations that are affordable robust and successful even outside its geographic boundaries Many global companies have recognized these changes and are ramping up their local R D capabilities At the same time several Indian firms are venturing out to international shores and gaining access to new markets Using a top down approach the book takes a closer look at systems of innovation at work and presents examples of

successful corporate innovations in multiple industries and their contextual conditions

**Push Factors and Capital Flows to Emerging Markets** Mr.Eugenio Cerutti,Mr.Stijn Claessens,Mr.Damien Puy,2015-06-22 This paper analyzes the behavior of gross capital inflows across 34 emerging markets EMs We first confirm that aggregate inflows to EMs co move considerably We then report three findings i the aggregate co movement conceals significant heterogeneity across asset types as only bank related and portfolio bond and equity inflows do co move ii while global push factors in advanced economies mostly explain the common dynamics their relative importance varies by type of flow and iii the sensitivity to common dynamics varies significantly across borrower countries with market structure characteristics especially the composition of the foreign investor base and the level of liquidity rather than borrower country s institutional fundamentals strongly affecting sensitivities Countries relying more on international funds and global banks are found to be more sensitive to push factors Our findings suggest that EMs need to closely monitor their lenders and investors to assess their inflow exposures to global push factors

**Bank Balance Sheets and External Shocks in Asia: The Role of FXI, MPMs and CFMs** Zefeng Chen,MissSanaa Nadeem,Mr.Shanaka J Peiris,2021-01-15 In emerging Asia banks constitute the dominant source of financing consumption and investment and bank balance sheets comprise large gross FX assets and liabilities This paper extends the DSGE model of Gertler and Karadi 2011 to incorporate these key features and estimates a panel vector autoregression on ten Asian economies to understand the role of the banking sector in transmitting spillovers from the global financial cycle to small open economies It also evaluates the effectiveness of foreign exchange intervention FXI and other macroeconomic policies in responding to external financing shocks External financial shocks affect net external liabilities of banks and the exchange rate leading to changes in credit supply by banks and investment For example a capital outflow shock leads to a depreciation that reduces the net worth and intermediation capacity of banks exposed to foreign currency liabilities In such cases the exchange rate acts as shock amplifier and sterilized FXI often deployed by Asian economies can help cushion the economy By contrast with real shocks the exchange rate serves as a shock absorber and any FXI that weakens that function can be costly We also explore the effectiveness of the monetary policy interest rate macroprudential policies MPMs and capital flow management measures CFMs

The In-Situ Approach to Sluicing Jun Abe,2015-04-15 It has been standardly claimed since Merchant 2001 that island violations can be repaired by simply deleting the categories that induce such violations as witnessed by sluicing an ellipsis construction that deletes TP with a remnant wh phrase This book aims to argue that such repair by ellipsis is simply a myth Alternatively the author argues for what is called the in situ approach to sluicing originally proposed by Kimura 2007 2010 according to which the remnant wh phrase in sluicing stays in situ This approach immediately explains the island insensitivity of sluicing since no overt wh movement is involved in the derivation of this construction Hence it challenges the approach in terms of island repair by ellipsis in that it nullifies the necessity of a repair mechanism This book makes an important contribution to the field in providing an alternative way of

approaching ellipsis phenomena that are claimed to induce island repair

**Seventh Periodic Monitoring Report on the Status of Implementation Plans in Response to Board-Endorsed IEO Recommendations** International Monetary Fund, 2015-04-09 The Seventh PMR includes i a discussion of progress made over the last year on the actions corresponding to four Management Implementation Plans MIPs that were classified as still in progress in the previous PMR and ii an assessment of the progress made in achieving the high level objectives in three areas directly related to those MIPs In addition an update on substantive issues related to five older MIPs agreed since 2007 is provided at the end of the report Three new evaluations have been completed by the IEO since March 2014 In July and August 2015 Management issued the MIPs in response to these evaluations Given that only a short time has passed since their completion progress in addressing the actions contemplated in those MIPs will be discussed in the next PMR

**What Slice of the Pie? The Corporate Bond Market Boom in Emerging Economies** Ms.Diana Ayala Pena,Milan Nedeljkovic,Christian Saborowski,2015-07-07 This paper studies the determinants of shifts in debt composition among EM non financial corporates We show that institutions and macro fundamentals create an enabling environment for bond market development During the recent boom episode however global cyclical factors accounted for most of the variation of bond shares in total corporate debt The sensitivity to global factors appears to vary with relative bond market size which we interpret to be associated with liquidity and easy entry and exit rather than local fundamentals Foreign bank linkages help explain why bond markets increasingly substituted for banks in channeling liquidity to EMs Our results highlight the risk of capital flow reversal in EMs that benefited from the upturn in the global financial cycle mostly due to their liquid markets rather than strong fundamentals
