

# Test Taking Motivational Letter

Dear \_\_\_\_\_,

You have worked hard this year and we have practiced all of the skills you need to know to be **SUCCESSFUL** on this test. Testing can be stressful but I want you to know I **BELIEVE IN YOU!** I hope you **BELIEVE IN YOURSELF** too!

Now that it is time to test your knowledge, all I can ask of you is for you to **WORK HARD** and **TRY YOUR BEST**. Read each passage carefully and use your test taking strategies as you work. Don't get stuck on a problem for too long because you can always go back to it when you finish the rest of the test. Also try to recall things we have practiced in class if you start to struggle on a question.

When the test is over we may not know your score immediately, but we will know that you worked hard and aimed to do a great job. We can **CELEBRATE** the effort you put in to taking this test.

Being your teacher has been a great experience and I will **NEVER** judge you based on a test score. Breathe and **RELAX** the best you can and remind yourself that **YOU ARE PREPARED**. Believe me, I know **"YOU'VE GOT THIS!"** It is time to show your **GREATNESS**, so **SMILE** and **DO YOUR VERY BEST!**

*Love your amazing teacher* (because you are an amazing student)

Brewer, Ludy T. Benjamin, Jr., 2001-08-01

Like its predecessors Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course, understanding students' interests, perceptions, and motives, students' existing knowledge of psychology including their misconceptions, a comparison of introductory textbooks, and tips on how to evaluate them, test questions, and student factors affecting exam performance, an overview of different forms of feedback, giving extra credit, and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology. **Resources in Education**, 2000-04
