Common Core State Standards Initiative is one of the most controversial pieces of education policy to emerge in decades. Detailing what and when K-12 students should be taught, it has led to expensive reforms and displaced other valuable ways to educate children. In this nuanced and provocative book, Nicholas Tampio argues that though national standards can raise the education bar for some students, the democratic costs outweigh the benefits. To make his case, Tampio describes the history, philosophy, content, and controversy surrounding the Common Core standards for English language arts and math. He also explains and critiques the Next Generation Science Standards, the Advanced Placement US History curriculum framework, and the National Sexuality Education Standards. Though each set of standards has admirable elements, Tampio asserts that democracies should disperse education authority rather than entrust one political or pedagogical faction to decide the country's entire philosophy of education. Ultimately, this lively and accessible book presents a compelling case that the greater threat to democratic education comes from centralized government control rather than from local education authorities.

Eureka Math, A Story of Ratios: Grade 7, Module 2 Great Minds, 2013-12-09

Common Core Mathematics is the most comprehensive CCSS-based mathematics curriculum available today. The modules are sequenced and paced to support the teaching of mathematics as an unfolding story that follows the logic of mathematics itself. They embody the instructional shifts and the standards for mathematical practice demanded by the CCSS. Each module contains a sequence of lessons that combine conceptual understanding, fluency, and application to meet the demands of each topic in the module. Formative assessments are included to support data-driven instruction. The modules are written by teams of master teachers and mathematicians. The New York Edition is nearly identical to the national version but available earlier for the 2013-2014 school year.
