Flight Operational Quality Assurance (FOQA) is a program that focuses on providing operators in the commercial airlines the ability to implement corrective security by use of shared information categorized as de-identified by the Federal Aviation Administration (FAA). The information equips FAA with the capacity to analyze and monitor operational security risk trends in the commercial airline industry. The information also referred to as aggregate de-identified shared information, is the main and critical variable used for the analysis of aircraft flights and other operations (Advisory Circular 2004). Analytically, therefore, FOQA enables stakeholders to make prior identification of security trends in the industr...
