of the ten year correspondence 1706-1716 between Gottfried Wilhelm Leibniz one of Europe's most influential early modern thinkers and Bartholomew Des Bosses a Jesuit theologian who was keen to bring together Leibniz's philosophy and the Aristotelian philosophy and religious doctrines accepted by his order. The letters offer crucial insights into Leibniz's final metaphysics and into the intellectual life of the eighteenth century. Brandon C. Look and Donald Rutherford present 71 of Leibniz's and Des Bosses' letters in the original Latin and in careful English translation. Few of the letters have been translated into English before. The editors also provide extensive annotations, deletions and marginalia from Leibniz's various drafts and a substantial introduction setting the context for the correspondence and analysing the main philosophical issues.

Reference Catalogue of Current Literature, 1880 **Education Outlook**, 1904 The Educational Times, and Journal of the College of Preceptors, 1905 Nonlinear Poisson Brackets Mikhail Vladimirovich Karasev, V. P. Maslov, 1993. This book deals with two old mathematical problems. The first is the problem of constructing an analog of a Lie group for general nonlinear Poisson brackets. The second is the quantization problem for such brackets in the semiclassical approximation which is the problem of exact quantization for the simplest classes of brackets. These problems are progressively coming to the fore in the modern theory of differential equations and quantum theory since the approach based on constructions of algebras and Lie groups seems in a certain sense to be exhausted. The authors' main goal is to describe in detail the new objects that appear in the solution of these problems. Many ideas of algebra, modern differential geometry, algebraic topology and operator theory are synthesized here. The authors prove all statements in detail thus making the book accessible to graduate students.
