

# Grade 11 Probability

In this chapter you:

- Review the language of probability.
- Use Venn diagrams showing two events to determine probabilities.
- Identify independent and dependent events.
- Use 2-way tables to determine probabilities of events happening.
- Reinvestigate the multiplication law for probability.
- Use tree diagrams to determine probabilities of events happening.
- Use Venn Diagrams showing three events to determine probabilities.

## WHAT YOU LEARNED ABOUT PROBABILITY IN GRADE 10

In Grade 10 you covered the following probability concepts:

- The use of probability models to compare the relative frequency of events with the theoretical probability.
- The use of Venn diagrams to solve probability problems.
- Rules for any two events  $A$  and  $B$  in sample space  $S$ :
  - $P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$
  - $A$  and  $B$  are mutually exclusive if  $P(A \text{ and } B) = 0$ .
  - $A$  and  $B$  are complementary if they are mutually exclusive  
And  $P(A) + P(B) = 1$   
Or  $P(B) = P(\text{not } A) = 1 - P(A)$   
Or  $P(A) = P(\text{not } B) = 1 - P(B)$

## THE LANGUAGE OF PROBABILITY

- ✓ A statistical experiment is one in which there are a number of possible outcomes, and we have no way of predicting which outcome will actually occur.
- ✓ A sample space is the set of all the possible outcomes in an experiment.

*Building A Learning Nation* Chris Pratt, 2019-03-19 In Building a Learning Nation Chris Pratt and Allison Chin use powerful evidence to expose serious fault lines in the English learning and education system The authors show that the result of a thirty year political consensus on education has been growing child mental ill health high levels of educational underachievement major skill shortages and a crisis in the retention and recruitment of teachers

Increasing numbers of children leading dysfunctional home lives coupled with ineffective government education and skills policies over decades are identified as the principal causes. The book explains how these problems make a defining contribution to the country's sluggish economic performance and deep social divisions. Above all else, *Building a Learning Nation* provides a compelling case for change. Unlike other critiques of contemporary education, it provides a well thought out workable alternative promoting lifelong learning for all, tackling underachievement, supporting families, radically changing the conditions within which schools operate and developing the skills the nation needs. **Library Leaflet**, 1919

**Guided Math Lessons in Third Grade** Nicki Newton, 2021-11-29. *Guided Math Lessons in Third Grade* provides detailed lessons to help you bring guided math groups to life. Based on the bestselling *Guided Math in Action*, this practical book offers 16 lessons taught in a round of 3 concrete, pictorial and abstract. The lessons are based on the priority standards and cover fluency, word problems, fractions and place value. Author Dr Nicki Newton shows you the content as well as the practices and processes that should be worked on in the lessons so that students not only learn the content but also how to solve problems, reason, communicate, their thinking model, use tools, use precise language and see structure and patterns. Throughout the book you'll find tools, templates and blackline masters so that you can instantly adapt the lesson to your specific needs and use it right away. With the easy to follow plans in this book, students can work more effectively in small guided math groups and have loads of fun along the way. Remember that guided math groups are about doing the math. So throughout these lessons you will see students working with manipulatives to make meaning, doing mathematical sketches to show what they understand and can make sense of the abstract numbers. When students are given the opportunities to make sense of the math in hands on and visual ways then the math begins to make sense to them. **Library Leaflet** United States. Bureau of Education, 1919. [Neoliberalism Economic Policy and the Collapse of the Public Sector](#) Lionel D. Lyles PhD., 2018-07-13. My book demonstrates how classical liberalism was the foundation upon which Thomas Jefferson, George Washington, Alexander Hamilton and others wrote the Declaration of Independence, Constitution and the Bills of Rights, however it was rolled back by 1980 and replaced with neoliberalism which was championed by the Reagan Administration. In short, this ideology has one main aim and that is to shrink government, cut the budgets of social programs and give away billions of taxpayer dollars to private business in the form of tax breaks. During the Jindal administration and by the end of its first term more than 7 billion worth of tax breaks had been given away to private business. A surplus of 1 billion left in the Louisiana treasury by outgoing governor Kathleen Blanco after Hurricane Katrina was given away by the end of the first two months of its first term. Today the Louisiana legislature is currently facing a 650 million fiscal cliff and no doubt more budget cuts are in store for the Louisiana public sector. *Future-Ready Teaching With AI* Aaron Blackwelder, Jason Cowley, 2024-12-21 Prepare your students for a future where AI literacy is crucial Artificial intelligence AI is here and seems on the brink of transforming education As teachers we know that AI will not diminish the need for students to learn essential skills It will however change how we teach and will require us to develop new skill sets for instruction and assessment Teachers have a new opportunity to embrace future ready instruction that prepares students to engage in a world that expects them to be AI literate In *Future Ready Teaching With AI Unlocking Student Potential in the Age of Artificial Intelligence* authors Aaron Blackwelder and Jason Cowley explore the integration of AI in the classroom and its potential to revolutionize teaching Much more than simply a book about using AI tools this rich resource aims to help teachers raise rigor increase engagement and promote more meaningful learning opportunities in their classrooms as they embrace the future of teaching and learning Offering evergreen principles and strategies to help educators navigate the age of AI this book Encourages critical thinking about the ethical use of AI to foster conversations with students Highlights various practical tools that can help teachers meet diverse student learning needs as well as create AI proof assignments Includes chapter vignettes sample AI prompts activities reflective questions and links to online resources to support teachers work in the classroom Examines how to leverage AI to streamline rudimentary tasks such as lesson planning assessment and differentiation allowing teachers to focus on building relationships providing feedback and personalizing learning for their students Written by two secondary teachers this book is an essential resource for K 12 teachers and administrators looking to move beyond the basics of using AI By equipping educators to become leaders in this transformation *Future Ready Teaching With AI* demonstrates how to harness the power of AI to help every student thrive

*Educating Everybody's Children* Robert W. Cole W. Cole, 2008-06-15 Designed to promote reflection discussion and action among the entire learning community *Educating Everybody's Children* encapsulates what research has revealed about successfully addressing the needs of students from economically ethnically culturally and linguistically diverse groups and identifies a wide range of effective principles and instructional strategies Although good teaching works well with all students educators must develop an extensive repertoire of instructional tools to meet the varying needs of students from diverse backgrounds Those tools and the knowledge base behind them are the foundation of this expanded and revised second edition of *Educating Everybody's Children* Each strategy discussed in the book includes classroom examples and a list of the research studies that support it The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers We must ensure that all teachers are capable of delivering a standards based curriculum that describes what students should know and be able to do and that these standards are delivered by means of a rich and engaging pedagogy of plenty By these two acts we can ensure

that all schools will be ready and able to educate everybody s children      *Science & Engineering Indicators* ,1987

Educational Freedom in Urban America David Salisbury,Casey Lartigue Jr.,2004-05-25 In 1954 the U S Supreme Court declared segregated public schools unconstitutional The ruling in Brown v Board of Education set public education on a course toward equality Yet five decades later schools are not equal Minority children living in America s inner cities suffer disproportionately from a failing education system with black and Hispanic students dropping out of public high schools at much higher rates than whites There is however reason for hope The expansion of school choice offers new opportunities for children struggling in failing schools In this collection a dozen leading scholars educators and reformers including Andrew Coulson Floyd Flake Frederick Hess and Paul E Peterson examine the legacy of Brown v Board and its relation to the modern day school choice movement A school administrator and a charter school founder also reveal the challenges and obstacles faced by enterprising teachers in trying to help their students Together these experts expose the modern barriers that deprive inner city children of a good education and call for increased school choice as the most effective way to achieve the goals of Brown v Board Educational Freedom in Urban America is essential reading for anyone concerned with the condition of our inner city schools and the racial and social inequities that still exist in American education      **Governmental Research Series** ,1954      *Official Gazette of the United States Patent Office* United States.
