## **Grade 8 Social Science Memorandum History 2014:**

*Breaking Point* Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II *Breaking Point* is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author's personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening's validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected

**Education for Knowing** Paul A. Wagner, Frank K. Fair, 2020-10-30 If our goal is Education for Knowing as the title says then we need to be guided by a conception of what knowing is For example we can all agree that there are math facts that students need to learn and we can agree that there are general concepts and laws that students should be acquainted with But is there more involved perhaps something like nurturing in students a desire to probe deeper into the workings of things Or developing a capacity to explain why things work the way they do Our conceptions of what genuine knowing is serve as guides to what we think the goal of education is and they tell us how to build a student However as it turns out there are multiple conceptions of what knowing truly involves and these conceptions tend to be different for different sets of education

stakeholders such as parents and their children school administrators and educational researchers Understanding this diversity of conceptions of knowing will make it easier for representatives of the different stakeholder groups to work together to accomplish the goal of building knowing students

**Failing Our Future** Joshua R. Eyler,2024-08-27 An indictment of the grading system in American schools and colleges and a blueprint for how we can change it One of the most urgent and long standing issues in the US education system is its obsession with grades In Failing Our Future Joshua R Eyler shines a spotlight on how grades inhibit learning cause problems between parents and children amplify inequities and contribute to the youth mental health crisis Eyler who runs the Center for Excellence in Teaching and Learning at the University of Mississippi illustrates how grades interfere with students intrinsic motivation and perpetuate the idea that school is a place for competition rather than discovery Grades force students to focus on rewards and distract them from exploring ideas or pursuing interests beyond

what they'll be tested on. In fact, grades significantly impede the learning process. They are also significantly affecting children's physical, emotional, and psychological well-being. Rates of anxiety, depression, and suicidal ideation have spiked, and academic stress tied to grades is a leading cause of this escalation. Eyer shares success stories of grading reform efforts that are already under way as an antidote to the harms caused by the practices currently used in educational institutions. Equal parts scathing and hopeful, *Failing Our Future* aims to improve the lives of students by encouraging them to define success on their own terms. Parents, educators, policymakers, and students will find in these pages a rallying cry for change and a blueprint for how to implement reforms in our homes and classrooms.

*Behavioral Evolution and Integrative Levels* G. Greenberg, E. Tobach, 2014-05-22. First published in 1984. In this collection of essays, Schneirla is identified as a scientist and citizen unafraid to hold and present unpopular ideas. Schneirla had always been opposed to the hereditarian views that allowed for the politicalization of psychology and spoke out early against the idea of the genetic basis of behavior. It is fitting that his ideas, which still form the nexus of the major theoretical criticism of classical ethology, now can be seen to stand in opposition to the hereditarian views of socio-biology.
