Discourses on Student Diversity in Canada Diane Gérin-Lajoie, 2008 This text examines recent changes to the Canadian educational system and their impact on the role of the school most significantly how the school must now function as an agent of inclusion for students who are not part of the mainstream school population Based on the findings of a comprehensive five year national study sponsored by the Social Sciences and Humanities Research Council of Canada Current Trends in the Evolution of School Personnel in Canadian Elementary and Secondary Schools the contributors examine the daily work activities working conditions and the interactions with students in view of recent changes to the educational system and the evolving role of the school Educators Discourses on Student Diversity in Canada Context Policy and Practice challenges the status quo and provides a timely comprehensive and critical overview of education and diversity in Canada **Teaching and Learning Secondary School Mathematics** Ann Kajander, Jennifer Holm, Egan J

Chernoff, 2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada The chapters address topics of broad applicability such as technology in learning mathematics recent interest in social justice contexts in the learning of mathematics as well as Indigenous education The voices of classroom practitioners the group ultimately responsible for implementing this new vision of mathematics teaching and learning are not forgotten Each section includes a chapter written by a classroom teacher making this volume unique in its approach We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step *Researching Pedagogy and Practice with Canadian Mathematics Teachers* David A Reid, Christine Suurtamm, Annie

Savard, Elaine Simmt, Dominic Manuel, Lisa Lunney Borden, Richard Barwell, 2020-06-01 The past two decades have seen an increased interest in education especially in core areas such as mathematics language and science This is in part a consequence of the increase in the number of international comparisons of educational outcomes such as PISA and TIMSS Much research has focused on the contributions that curricula financial resources parental support and so on might have on educational outcomes A factor that seems likely to have a very significant effect on student achievement teachers practices and beliefs has received little attention This book reports results from a research program that sought to develop and employ research methods to compare teachers practices and beliefs across Canada It provides insight into the challenge of such research and describes teachers contexts beliefs and practices and how they differ in four regions and across two languages

Using a multivocal ethnography approach Tobin 1999 teachers were involved in the preparation and discussion of videos of their own teaching and that of others This approach resulted in not only insights into the teachers pedagogies and practices but also opportunities for the teachers to reflect on their own teaching in new ways and for researchers to reflect on research practices and orientations The work is innovative in several ways In a field crowded with research on teachers practices beliefs and knowledge this research helps to unearth the implicit values that underlie the way teachers see teaching itself Through the process of observation of each other s practice the teachers became aware of their own pedagogies giving them new insights into their values and practices Researchers also engaged in a parallel process of reflection on their own practices as observers of teachers with similar insights into the values guiding their work This book will be of interest to government policy makers teachers and teacher educators as well as researchers in Mathematics Education Members of the AERA SIG in Research in Mathematics Education the Canadian Mathematics Education Study Group the NCTM and provincial Mathematics teacher associations are potential readers Praise for Researching Pedagogy and Practice with Canadian Mathematics Teachers What a treasure This book is an important resource for anyone interested in high quality mathematics teaching It fills a gap in our understanding of how mathematics is taught across Canada where students are among the highest performing on international mathematics assessments The studies reported are conceptually grounded methodologically rigorous and filled with nuanced observations of the similarity and variation in classroom teaching across many of the Canadian provinces Edward A Silver Senior Associate Dean for Research Graduate Studies William A Brownell Collegiate Professor of Education Professor of Mathematics University of Michigan **Resources in Education** ,2001-10
