countries continue to recover under the influence of a reduced drag from fiscal consolidation and improving labor markets. Financial conditions will eventually tighten and when they do there is risk of further volatility. Most developing countries are in good fiscal and financial shape but where vulnerabilities remain countries need to tighten policy to reduce the potential impact of external shocks. Overall growth for developing countries will be solid but not strong enough to generate the income and employment gains needed to eliminate poverty by 2013. As a result countries need to focus on structural reform in order to lift growth in an enduring and sustainable manner.

Entrepreneurship, Business and Economics - Vol. 2 Mehmet Huseyin Bilgin, Hakan Danis, 2016-03-23 This volume of Eurasian Studies in Business and Economics focuses on latest results from research in Banking and Finance, Accounting and Corporate Governance, Growth and Development along with a focus on the Energy sector. The first part on Accounting and Corporate Governance features articles on environmental accounting, audit quality, financial information and adoption of governance principles. The Banking and Finance part looks at risk behavior in banks, credit ratings during subprime crisis, stakeholder management and stock market crises. The book focuses then on the energy sector and analyzes macroeconomic impacts of electricity generation, risk dimensions in wind energy, the latest EU energy reforms and discusses prediction models.

Global Economic Prospects, Volume 8, January 2014 The World Bank, 2014-02-05 High income economies appear to be finally turning the corner, contributing to a projected acceleration in global growth from 2.4 percent in 2013 to 3.2 percent this year, 3.4 percent in 2015 and 3.5 percent in 2016. Overall growth in developing countries is projected to pick up modestly from 4.8 percent in 2013 to 5.3 percent this year, 5.5 percent in 2015 and 5.7 percent in 2016. In the baseline, the withdrawal of quantitative easing and its effect on the long end of U.S. interest rates is assumed to follow a relatively slow, orderly trajectory. If however the taper is met with an abrupt market adjustment, capital inflows could weaken sharply, placing renewed stress on vulnerable developing economies. In a scenario where long term interest rates rise rapidly by 100 basis points, capital inflows could decline by as much as 50 percent for several quarters.

These developments could in turn impede progress made in recent years in poverty reduction. These developments could in turn impede progress made in recent years in poverty reduction.
