Distance, Rating Systems and Enterprise Finance Franz Flögel,2018-07-27 In response to the credit crunch during the global financial crisis of 2007 2008 many have called for the re establishment of regional banks in the UK and elsewhere In this context Germany s regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises SMEs However in line with the death of distance debate the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs calling into question the key advantage of regional banks Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide operating commercial

banks in Germany The ethnographic insights are contextualised by concise description of the three pillar German banking system covering bank regulation structural and geographical developments and enterprise finance Furthermore the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism Ethnographic findings reveal varying distances of credit granting depending on the rating results i e large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks Nevertheless by presenting case studies of lending to SMEs the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected

Contemporary Financial Intermediation Stuart I. Greenbaum, Anjan V. Thakor, Arnoud W. A. Boot, 2019-05-14

Contemporary Financial Intermediation 4th Edition by Greenbaum Thakor and Boot continues to offer a distinctive approach to the study of financial markets and institutions by presenting an integrated portrait that puts information and economic reasoning at the core Instead of primarily naming and describing markets regulations and institutions as is common Contemporary Financial Intermediation explores the subtlety plasticity and fragility of financial institutions and credit markets In this new edition every chapter has been updated and pedagogical supplements have been enhanced For the financial sector the best preprofessional training explains the reasons why markets institutions and regulators evolve they do why we suffer recurring financial crises occur and how we typically react to them Our textbook demands more in terms of quantitative skills and analysis but its ability to teach about the forces shaping the financial world is unmatched Updates and expands a legacy title in a valuable field Holds a prominent position in a growing portfolio of finance textbooks Teaches tactics on how to recognize and forecast fluctuations in financial markets **Breaking Ranks** Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and

outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
