Meakin, 1999-07-31 This book is based on the 1997 Kongsberg seminar organised by the Department of Geology at the University of Oslo The seminar brought together scientists from various disciplines involved in the study of growth and dissolution of minerals and pattern formation in geosystems The volume includes several chapters dealing with non equilibrium growth processes and pattern formation which have recently become recognised as much more common in geological systems than hitherto thought The multidisciplinary context of this book will promote cross fertilisation of ideas in a rapidly developing area that has a wide range of important applications in mineralogy and petrology as well as in other areas of science and technology Audience This volume will be of interest not only to a wide audience within the geoscience community but also to scientists working in related disciplines interested in mineral growth and dissolution processes in general and the coupling of such processes with transport and deformation in sedimentary and metamorphic systems
