

Experiment 1

AIM: Study of Slip Gauges along with their usage i.e. wringing of Slip Gauges

APPARATUS: Slip Gauge Set, Surface plate, Soft Cloth

DESCRIPTION:

(I) SLIP GAUGES or GAUGE BLOCKS:

Slip Gauges are the universally accepted standard of length in the industry.

They are used

- (1) For direct precise measurement where the accuracy of the workpiece demands it.
- (2) For use with high-magnification comparators, to establish the size of the gauge blocks in general use.
- (3) Also used for many other purposes such as checking the accuracy of measuring instruments or setting up a comparator to a specific dimension.

Slip gauges also known as Gauge blocks or Johansson gauges are cuboidal-shaped blocks of high-grade steel with a high finish. They are used mainly used as measuring standards in the engineering field. These are first hardened to resist wear and carefully stabilized so that they are independent of any subsequent variation in size or shape. After being hardened, blocks are carefully finished on the measuring faces to such a fine degree of finish, flatness, and accuracy that any two such faces when perfectly clean may be wrung together.
