**Teaching Writing** Tessa Daffern, Noella M Mackenzie, 2020-07-25 In the 21st century writing is more important than at any other time in human history Yet much of the emphasis in schooling has been on reading and after the early years writing skills have been given less attention Internationally too many children are leaving school without the writing skills they need to succeed in life The evidence indicates that students rarely develop proficiency as writers without effective teacher instruction *Teaching Writing* offers a comprehensive approach for the middle years of schooling when the groundwork should be laid for the demanding writing tasks of senior school and the workplace *Teaching Writing* outlines evidence based principles of writing instruction for upper primary students and young adolescents It presents strategies that are ready for adoption or adaptation and exemplars to assist with designing and implementing writing lessons across the middle years of school It addresses writing from a multimodal perspective while also highlighting the importance of teaching linguistic aspects of text design such as sentence structure vocabulary and spelling as foundations for meaning making Contributors argue that students need to continue to develop their skills in both handwriting and keyboarding Examples of the teaching of writing across disciplines are presented through a range of vignettes Strategies for assessing student writing and for supporting students with diverse needs are also explored With contributions from leading literacy educators *Teaching*

relation to learning This is the most thought provoking book to be published on pedagogy in a long long time Conceptually elegant and empirically rich it undercuts conventional wisdom and potentially rearranges how we think about teaching learning and writing It argues that students bodies not just their minds matter in learning explaining how in practice the desire to learn is a mindful bodily disposition And it shows how through an enabling form of discipline teachers can produce a scholarly habitus in all students including the educationally disadvantaged and defiant Jane Kenway Professor of Education Monash University Discipline and Learn Bodies Pedagogy and Writing an excellent book which makes an important contribution to our understanding of both pedagogy and the body and which is sure to spark debate in both fields It is careful and judicious in its approach but still manages to be provocative and original Nick Crossley Professor of Sociology University of Manchester
