

Figure 10.1

Examine the karyotype in Figure 10.1. Is it male or female?

Figure 10.1 is male.

How do you know?

Because there is one large X chromosome and one small Y chromosome. If there is one large X chromosome and one small Y chromosome, it is male. If there is one large X chromosome and one small X chromosome, it is female.

How do chromosomes appear in cells just before division?

10. **Chromosomes:** In the cells of a fruit fly, compare the 4 pairs of chromosomes. Which chromosomes do you think have more DNA? Explain.

Chromosomes that are larger have more DNA. Chromosomes that are smaller have less DNA. Chromosomes that are larger have more DNA. Chromosomes that are smaller have less DNA.
