

Maintenance

Care of the machine

To keep your sewing machine operating satisfactorily it requires, like other precision machines, regular cleaning. It need not, however, be lubricated.

Removing the stitch plate

Remove the presser foot and lower the feed teeth. There is a recess in the free arm to the right above the hook cover. Push the stitch plate straight up and backward at the same time until it loosens. Clean between the feed teeth with the brush which you will find in the accessory box.

Replacing the stitch plate

Insert it from behind into the recess in the arm. Ease the front edge up onto the small pin and continue to push it forward until it snaps into place.

Whenever necessary the bobbin case and hook should also be brushed clean. Sizing or finishing compounds from fabric may adhere to the spindle of the hook. If this has happened, the spindle should also be cleaned with the brush. Remove any pieces of thread which may have become wound around the spindle.

Belts

Belts adjustment is not required.

Changing the light bulbs

The machine is equipped with two lights to provide the best possible lighting and avoid shadowing from the presser bar and needle bar, as illustrated.

Removing the plastic guard

Insert the small screwdriver at the rear edge of the guard, by the arrows, and applying slight downward leverage.

Changing the bulb

Do not turn the bulb, just pull it downward and fit in a new one.

Replacing the plastic guard

Start by inserting the front edge and press it into the holder.

Use light bulbs designed for 12 V and maximum 5 W as indicated on the light guard.
