Improved Predictive Clustering Tree Algorithm with Post Pruning Prajapati Purvi,Thakkar Amit,2014-12-09 Multi label classification is a variation of single label classification problem where each instance is associated with more than one class label The foremost unremarkably used approach to handle multi label classification problem is to transfer multi label problem into single label problems where binary classifier is learned independently for every attainable class labels However multi labeled data generally exhibit relationships between labels but multi label classification approach fails to take such relationships under consideration It s understood that in this type of classification labels co relationship should be maintain Label co relationships can be visualized either in tree structure hierarchies or in DAG Directed Acyclic Graph structure hierarchies These hierarchical arrangement of labels maintain the hierarchical constraint that is once an instance belongs to some class that automatically belongs to all its super classes This book presents several variations to the induction of decision tree using Predictive Clustering Tree PCT algorithm for Hierarchical Multi label Classification [Advances in Information and Communication](#) Kohei Arai,Supriya Kapoor,Rahul Bhatia,2020-02-13 This book presents high quality research on the concepts and developments in the field of information and communication technologies and their applications It features 134 rigorously selected papers including 10 poster papers from the Future of Information and Communication Conference 2020 FICC 2020 held in San Francisco USA from March 5 to 6 2020 addressing state of the art intelligent methods and techniques for solving real world problems along with a vision of future research Discussing various aspects of communication data science ambient intelligence networking computing security and Internet of Things the book offers researchers scientists industrial engineers and students valuable insights into the current research and next generation information science and communication technologies **Soft Computing in Data Science** Bee Wah Yap,Azlinah Hj Mohamed,Michael W.
